## Livestock and Crops Continue to Suffer

The drought continued to develop across the state under hot and dry conditions the past week. Over 61 percent of the state was in a moderate to extreme drought per the July 3rd Drought Monitor. Little to no rain fell in western and central Oklahoma, with a few isolated areas of heavier rainfall in eastern Oklahoma and the Panhandle: Hooker recorded 2.5 inches of rain in the Panhandle and McAlester received two inches. Average temperatures were in the mid 80 's and highs continued to top 100 degrees. All crops suffered from the developing drought, though dryland crops fared worse with the lack of precipitation the past few weeks. Livestock conditions declined somewhat, as the heat took its toll on the animals, as well as the available pasture and stock ponds. Grasses were burning up and hay production was limited. Topsoil moisture conditions were rated mostly short to very short, with only six percent rated adequate. Subsoil moisture conditions were rated short to very short, with 14 percent rated adequate. There were 6.7 days suitable for field work.

| Soil Moisture Conditions by Percent <br> Week Ending Sunday, July 8, 2012 |  |  |  |
| :--- | :---: | :---: | :---: |
| Moisture Rating | Current <br> Week | Previous <br> Week | One Year <br> Ago |
| Topsoil |  |  |  |
| Very Short | 48 | 25 | 74 |
| Short | 46 | 54 | 22 |
| Adequate | 6 | 21 | 4 |
| Surplus | 0 | 0 | 0 |
| Subsoil |  |  |  |
| Very Short | 41 | 30 | 68 |
| Short | 45 | 46 | 27 |
| Adequate | 14 | 24 | 5 |
| Surplus | 0 | 0 | 0 |

Small Grains: Plowing of wheat ground was 75 percent complete, 27 points ahead of normal and rye plowing was 74 percent complete. Plowing of oat ground was 77 percent complete by Sunday.

Row Crops: Conditions continued to decline as drought conditions worsened and little rain fell. Peanuts were rated mostly good while soybeans and cotton were rated mostly fair. Corn silking was 64 percent complete by the end of the week, and 32 percent had reached the dough stage, 18 points ahead of normal. Sorghum emergence was 95 percent complete by Sunday, 21 points ahead of normal. Sorghum heading was 21 percent complete by Sunday. Virtually all soybeans had emerged by week's end, well ahead of normal. Seventeen percent of soybeans were blooming by the end of the week. Peanut pegging was 39 percent complete by Sunday. Forty percent of the cotton crop was squaring by Sunday and six percent was setting bolls.

Virtually the entire watermelon crop was setting fruit, 15 points ahead of normal. Harvest had begun and was 18 percent complete by the end of the week.

Hay: Hay condition ratings continued to decline, rated mostly good to fair. Hay production suffered with the expanding drought. A second cutting of alfalfa was 95 percent complete by the end of the week and a third cutting was 51 percent complete, 24 points ahead of the five-year average. A first cutting of other hay was 92 percent complete, and a second cutting was 18 percent complete by Sunday, 13 points ahead of normal.

Pasture and Livestock: Pasture and range condition ratings continued to fall; rated mostly fair to poor, with 10 percent rated very poor. Both the heat and heavy grasshopper populations continued to limit available pasture for livestock. Livestock condition ratings fell but continued to be rated mostly good. Prices for feeder steers less than 800 pounds averaged $\$ 151$ per cwt. Prices for heifers less than 800 pounds averaged $\$ 140$ per cwt.

| Conditions by Percent <br> For Week Ending Sunday, July 8, 2012 |  |  |  |  |  |
