Volume 45, Number 31 Weekly Summary for September 5 – September 11 Issued September 12, 2022

Rainfall totals in Oklahoma averaged 0.11 of an inch. According to the September 6th US Drought Monitor Report, drought conditions were rated 100 percent abnormally dry to exceptional drought, unchanged from the previous week. Additionally, 97 percent of the state was in the moderate drought to exceptional drought category, down 2 points from the previous week. Statewide, temperatures averaged in the lower 70's. Topsoil moisture conditions were rated mostly short to adequate, while subsoil moisture conditions were rated short to very short. There were 6.8 days suitable for fieldwork.

Small Grains: Winter wheat planted reached 11 percent, up 4 points from the previous year and up 7 points from normal.

Row Crops: Corn dough reached 95 percent, down 3 points from the previous year. Corn dented reached 82 percent, up 2 points from the previous year and up 4 points from normal. Corn mature reached 37 percent, down 4 points from the previous year and down 4 points from normal. Corn harvested reached 15 percent. Sorghum headed reached 95 percent, down 1 point from the previous year and down 2 points from normal. Sorghum coloring reached 70 percent, up 3 points from the previous year and up 2 points from normal. Sorghum mature reached 26 percent, up 2 points from the previous year but down 3 points from normal. Soybeans blooming reached 95 percent, down 1 point from the previous year but up 2 points from normal. Soybeans setting pods reached 74 percent, down 2 points from the previous year but up 1 point from normal. Soybeans dropping leaves reached 12 percent, up 2 points from the previous year and up 2 points from normal. Peanuts mature reached 40 percent, up 7 points from the previous year and up 15 points from normal. Cotton bolls opening reached 28 percent, up 6 points from the previous year but down 5 points from normal.

Hay: In the Central district, reporters indicated that hay yields are approximately half of normal. The fourth cutting of alfalfa hay reached 53 percent, down 5 points from the previous year and down 16 points from normal. The third cutting of other hay reached 50 percent, up 24 points from the previous year and up 23 points from normal.

Pasture and Livestock: Pasture and range condition was rated at 68 percent very poor to poor. Livestock condition was rated at 75 percent fair to good.
