Estimates in this report are the result of data collected during the January Sheep and Goat Survey from a random sample of producers across the nation. Survey procedures ensured that all sheep and goat producers, regardless of size, had a chance to be included in the survey. Data provided by Oklahoma producers are the foundation of these estimates made for the state. We would like to thank all who responded to the survey and made these estimates possible.

Inventory, lamb and kid crop estimates for the previous year were also reviewed using official slaughter data, import and export data, and the relationship to of the current survey indications to previous surveys. Prior year inventory, lamb and kid crop items were revised at the U.S. level and in most states.
