The June wheat yield and production forecast are based on two surveys conducted by the Southern Plains Regional Field Office: a farm operator survey and an objective yield survey. The farm operator survey was conducted primarily by telephone with some use of mail, internet and personal interviews. The objective yield survey collects actual stalk counts and head weights from plots set up in producer fields across the states of Oklahoma and Texas.

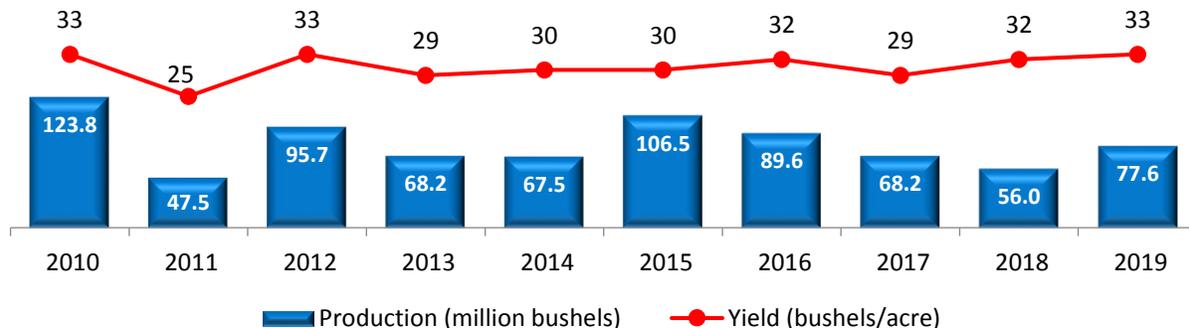

Data provided by Oklahoma and Texas operators are the foundation of the estimates for the Southern Plains region. We would like to thank all farmers who responded to the Ag Yield survey and to those wheat producers who permitted objective measurements to be taken in their fields.

Oklahoma Wheat Production and Yield

Wheat production for **Oklahoma** is forecast at 111 million bushels, up 59 percent from last year. This forecast is up 6.0 million from the Oklahoma May forecast. Yield per acre is expected to average 37.0 bushels, up 9.0 bushels from the previous year. Acres expected to be harvested for grain, at 3.00 million acres, are up 20 percent from 2018.

Texas Wheat Production and Yield

Wheat production for **Texas** is forecast at 77.6 million bushels, up 38 percent from last year. This forecast is unchanged from the Texas May forecast. Yield per acre is expected to average 33.0 bushels, up 1 bushel from 2018. Harvested acreage for grain, at 2.35 million acres, is up 34 percent from the previous year.

Winter wheat production in the Northern High Plains is forecast at 36.5 million bushels, up 85 percent from last year. Winter wheat production in the Blacklands is forecast at 9.4 million bushels, down 33 percent from the previous year. The Southern Low Plains production is estimated at 10.7 million bushels, up 23 percent from 2018.

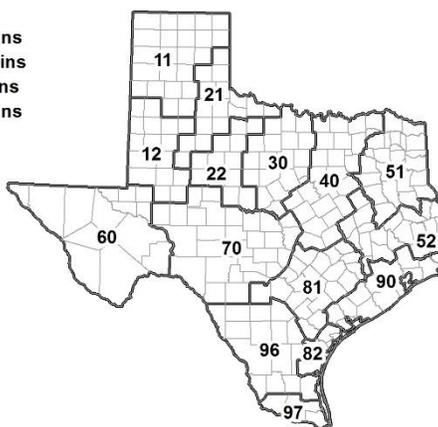

Texas Wheat District Estimates, 2018 and June 1, 2019 Forecast

| District | Planted Acres | | Harvested Acres ¹ | | Yield Per Acre | | Production | |
