

# ANNUAL COTTON REVIEW

## ACREAGE AND PRODUCTION

Data Source: USDA-NASS *Monthly Crop Production* reports

Final 2019 Upland Cotton production for Oklahoma was estimated at 659 thousand 480-pound bales, down 3 percent from 2018. The average yield was estimated at 688 pounds per acre, up 46.0 pounds from last year. Acres harvested were estimated at 460,000, down 50,000 acres from the previous year.

Final 2019 Upland Cotton production for the United States was estimated at 19.2 million 480-pound bales, up 9 percent from the previous year. The U.S. average yield for Upland Cotton was estimated at 810 pounds per acre, down 55.0 pounds from 2018. Harvested area, at 11.4 million acres, is up 17 percent from the 2018 harvested acreage of 9.74 million.

<sup>1</sup> Excluding linters.

Welcome to the 2020 issue of the *Annual Cotton Review*. Thanks to all participants in the cotton industry for their continued support and cooperation especially the respondents who provide data for the bimonthly Cotton Ginnings survey, quarterly Agricultural surveys, and monthly Ag Yield surveys. Without their commitment and participation, this report would not be possible.

This publication is a compilation of related reports issued by USDA's National Agricultural Statistics Service (NASS) in an effort to provide a complete source of statistics relevant to the cotton industry. Though many of the statistics in this summary can be accessed through our website on a regular basis at [www.nass.usda.gov/Publications/](http://www.nass.usda.gov/Publications/), this review is issued each year following the release of the USDA-NASS *Crop Production* report released in May.

I hope you find this information useful!
