United States Sweet Cherry Production Down 6 Percent

United States sweet cherry production is forecast at 318,000 tons, down 6 percent from 2015.

In California, counties with the largest production reported substantial damage to cherries due to heavy rains early in May which significantly reduced the crop. Some growers ceased harvesting after finding cracks in 50 to 70 percent of their cherries.

Growers in Oregon and Washington reported a record early harvest this year due to warm weather.

In Michigan, growers were optimistic about having a better crop than in 2015. Sweet cherries were generally reported as developing on schedule and growth looked good throughout the State.

Sweet Cherry Production — States and United States: 2014, 2015, and Forecasted 2016

[Blank cells indicate estimation period has not yet begun]

State	Total production		
	2014	2015	2016
	(tons)	(tons)	(tons)
California	33,200	68,000	60,000
Idaho ¹	2,120	2,600	(NA)
Michigan	29,860	15,900	21,000
Montana ^{1 2}	2,090		(NA)
New York ¹	630	900	(NA)
Oregon	57,900	41,000	42,000
Utah ¹	1,050	85	(NA)
Washington	237,000	210,000	195,000
United States	363,850	338,485	318,000

(NA) Not available.

¹ Estimates discontinued in 2016.

² The first estimate for 2015 sweet cherries in Montana will be published in the July 2016 *Noncitrus Fruits and Nuts 2015 Summary*.

United States Tart Cherry Production Up 39 Percent

United States tart cherry production is forecast at 309 million pounds, up 39 percent from the 2015 production.

In Michigan, the largest producing State, growers were confident about the tart cherry crop with higher forecasted yields than last year. The crop was developing on schedule with good growth on trees reported throughout the State.

Utah growers reported a crop that will result in relatively good production. Favorable conditions contributed to good yields. In Wisconsin, the major tart cherry growing area of the State escaped a late frost and growers were looking forward to a good year.

In Washington, growers reported a record early harvest this year due to warm weather.

New York growers anticipate a less than average crop this year. Most growers reporting low production cited freeze and frost at bloom.

Tart Cherry Production — States and United States: 2014, 2015, and Forecasted 2016

State	Total production		
	2014	2015	2016
	(million pounds)	(million pounds)	(million pounds)
Michigan	203.0	134.0	222.7
New York	10.0	8.2	8.0
Oregon ¹	2.4	2.8	(NA)
Pennsylvania ¹	0.9	3.2	(NA)
Utah	51.0	40.0	43.0
Washington	24.3	25.0	24.4
Wisconsin	12.3	9.4	11.0
United States	303.9	222.6	309.1

(NA) Not available.

¹ Estimates discontinued in 2016.

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site <http://www.nass.usda.gov>
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit <http://www.nass.usda.gov>. Hover over the "Publications" drop down. Under "Receive reports by Email" section in the lower right corner, select the report(s) you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.
