2001	-	2,000	2.41	4,819	104.08	501,557
2002	-	1,950	2.39	4,662	124.70	581,337
2003	-	1,930	2.74	5,282	122.32	646,071

¹ Value of production based on final State marketing year average price. ² Estimates began in 2000. ³ Forage production includes all forms of harvested hay on a dry equivalent basis. Several assumptions are made to convert haylage and greenchop to a dry equivalent. Haylage production is based on haylage weight at harvest and then converted to dry equivalent production. ⁴ Figures include only hay that was harvested as haylage or greenchop. Dry baled hay is not included. ⁵ All Forage is the sum of the following dry equivalents: a) alfalfa hay harvested as **dry hay**, b) all other hay harvested as **dry hay**, c) alfalfa haylage and greenchop, d) all other hay haylage and greenchop.
