¹ Excludes some quantities of vegetables and fruit not harvested or not marketed because of economic conditions and excess cullage of fruit. ² Includes allowance for loans outstanding and purchases by government valued at average loan and purchase rates. ³ Total of utilized production. ⁴ Forage production includes all forms of harvested hay on a dry equivalent basis. Several assumptions are made to convert haylage and greenchop to a dry equivalent. Haylage production is based on haylage weight at harvest and then converted to dry equivalent production. ⁵ 2003 production year ending June 30, 2003. ⁶ Estimate not published in order to maintain confidentiality.
