Pennsylvania farmers voluntarily participate in quarterly agricultural labor surveys in January, April, July and October. These surveys provide data concerning the number of hired farm workers; hours worked, and wage rates. The survey reference week is the seven-day period (Sunday through Saturday) which includes the 12th day of the month. Results for Pennsylvania are published as part of Northeast Region II, which includes Delaware, Maryland, and New Jersey.

The total number of workers hired by farm operators in the Northeast II Region during 2010 ranged between a low of

25,000 in January to a high of 37,000 in July and October. The average hours worked during the survey week by all hired workers varied from 36.5 hours in January 2010 to 41.9 hours in October 2010.

In 2010, all hired workers earned between \$10.60 per hour in April to \$12.05 per hour in October. During the same period, field workers' hourly wage rates ranged between \$10.43 in April to \$11.84 in October. In contrast, livestock workers' hourly wage rates ranged from \$9.09 in July to \$10.17 in October.
