USDA Conducts Quarterly Hogs and Pigs Survey

HARRISBURG, PA – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) is contacting producers for the September Hogs and Pigs Survey. This survey is a comprehensive gathering of quarterly data on market hog and breeding stock inventories as well as pig crop and farrowing intentions in selected states.

“Pennsylvania inventory of all hogs and pigs on June 1, 2021 was 1.36 million head. This is down 3% from June 1, 2020, but up 1% percent from March 1, 2021,” according to King Whetstone, director of the NASS Northeastern Regional Field Office. “The September survey and resulting report will continue to provide important indicators for the industry of what changes are occurring – if any,” added Whetstone.

NASS will mail the questionnaires to all producers selected for the survey in late August. To ensure all survey participants have an opportunity to respond, NASS interviewers will contact producers who do not respond by mail or online to conduct telephone interviews.

The data gathered in this survey allow NASS to accurately measure and report conditions and trends in the U.S. pork industry. The information is used by all sectors of the industry, including producers themselves, to help make sound and timely business decisions.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

Survey results will be published in the *Quarterly Hogs and Pigs* report to be released on September 24, 2021. These and all NASS reports are available online at www.nass.usda.gov/Publications/. For more information, call the NASS Northeastern Regional Field Office at (800) 498-1518.
