## USDA to collect 2021 oilseed data

**HARRISBURG, PA** - October 28, 2021 - As the 2021 growing season officially comes to an end, the U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) will contact producers nationwide to gather oilseed data. The information will help determine the official USDA estimates of 2021 acreage, harvested yield, and price for oilseed crops in the United States.

Data from the survey will benefit farmers and processors by providing timely and accurate information to help them make critical year-end business decisions and begin planning for the next growing and marketing season. NASS will analyze the survey information and publish the results in the 2021 Crop Production Annual Summary report, to be released in January 2022.

As with all NASS surveys, information provided by respondents is confidential, as required by federal law. NASS safeguards the privacy of all responses and publishes only aggregate data, ensuring that no individual operation or producer can be identified. All NASS reports are available online at [www.nass.usda.gov/Publications/](http://www.nass.usda.gov/Publications/).

For more information call the NASS Northeastern Regional Field Office at (800) 498-1518.

###

*NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture*

*USDA is an equal opportunity provider, employer, and lender.*
