USDA conducts quarterly hogs and pigs survey

HARRISBURG, PA – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) is contacting Pennsylvania hog producers for the quarterly Hogs and Pigs Survey in June and September. This survey is a comprehensive gathering of quarterly data on market hog and breeding stock inventories as well as pig crop and farrowing intentions in every state.

“Pennsylvania inventory of all hogs and pigs on March 1, 2022, was 1.34 million head. This was the same inventory level as March 1, 2021, and up 2 percent from December 1, 2021,” according to King Whetstone, director of the NASS Northeastern Regional Field Office. “The quarterly hogs surveys and resulting reports will continue to provide important indicators for the industry of what changes are occurring – if any,” added Whetstone.

NASS will mail the questionnaires to all producers selected for the survey in late-May and late-August. To ensure all survey participants have an opportunity to respond, NASS interviewers will contact producers who do not respond by mail or online to conduct telephone interviews.

The data gathered in this survey allow NASS to accurately measure and report conditions and trends in the U.S. pork industry. The information is used by all sectors of the industry, including producers themselves, to help make sound and timely business decisions.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

Survey results will be published in the *Quarterly Hogs and Pigs* report to be released on June 29, 2022, and September 29, 2022. These and all NASS reports are available online at www.nass.usda.gov/Publications/. For more information, call the NASS Northeastern Regional Field Office at (800) 498-1518.
