Pennsylvania ag producers near Feb. 6 deadline for 2022 Census of Agriculture

HARRISBURG, PA – The U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) reminds Pennsylvania farmers and ranchers that the deadline to respond to the 2022 Census of Agriculture is next week, Feb. 6. Producers can respond online at agcounts.usda.gov or by mail.

Last month, NASS mailed the Census of Agriculture questionnaires to every known ag producer in Pennsylvania, the U.S., and Puerto Rico. Conducted just once every five years, the ag census provides a complete account of the nation's farms and ranches and the people who operate them. Responding to the Census of Agriculture is required by federal law under Title 7 USC 2204(g) Public Law 105-113. The same law requires NASS to keep all individual operations' information confidential, use the data for statistical purposes only, and publish the data in aggregate form to prevent disclosing the identity of any individual producer or farm operation.

"Whether their operation is small or large, urban or rural, the Census of Agriculture provides every farmer and rancher across Pennsylvania the opportunity to influence the future of American agriculture," said NASS Northeastern Regional Director King Whetstone. "The Census of Agriculture data help farmers and ranchers make informed decisions. Policy makers, researchers, community planners and more use the data to help serve agriculture and rural communities."

The Census of Agriculture remains the only source of uniform, comprehensive, and impartial agriculture data for every state, county, and U.S. territory. U.S. farm operations of all sizes, urban and rural, which produced and sold, or normally would have sold, \$1,000 or more of agricultural products in 2022, are included as well as Puerto Rico farm operations which produced and sold, or normally would have sold, \$500 or more of agricultural products in the ag census year.

Producers who have submitted their completed ag censuses may disregard any additional ag census letters and forms. Whether producers responded online or by mail, they can verify their reports were received by going to agcounts.usda.gov, entering their survey codes, and checking the submitted date under the status column of the My Surveys tab. The status update is not always immediate. The update can take a few minutes up to several days, especially if the questionnaire was returned by mail.

NASS will release the results of the ag census in 2024. Visit nass.usda.gov/agcensus, for more information.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
