# Pennsylvania's 2013 Machinery Custom Rates

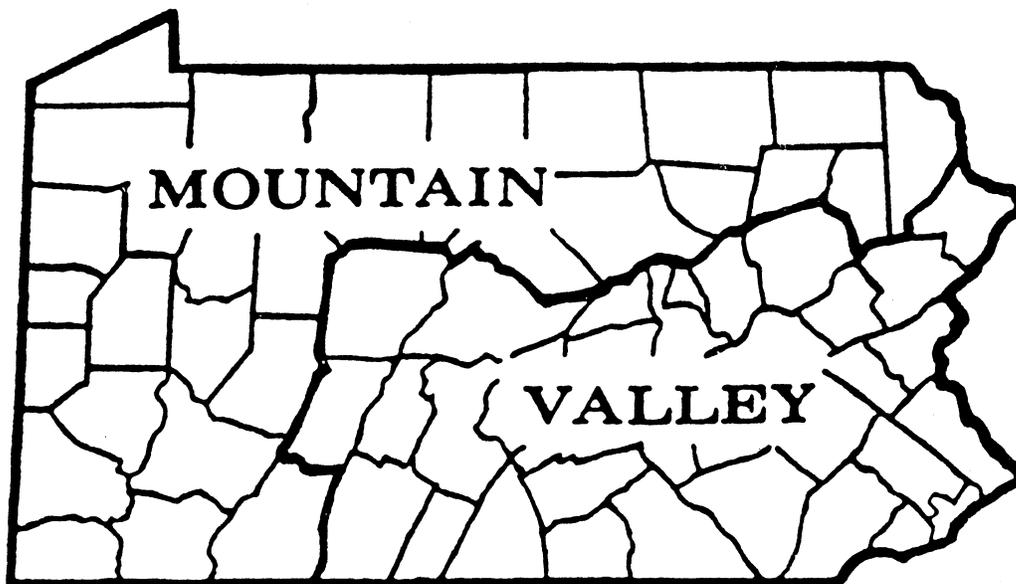

*By Adam W. Pike, Agricultural Statistician*

The custom rates shown are averages from voluntary reports by custom operators and farmers throughout Pennsylvania. Most of the rates are stated per acre, cwt., ton, bale, or bushel rather than per hour to reduce the variation due to machinery size. The rates shown include the cost of hiring machine with fuel and operator and exclude the cost of seed, fertilizer, and other materials used unless otherwise specified. Individual rates vary due to differences in working conditions, services performed, or even the operator's eagerness to do custom work. Therefore, the average rates shown should not be considered absolute indications of fair charges.

Average rates are shown separately for two regions of the state, labeled "**Mountain**" and "**Valley**". The differences in rates between regions reflect differences in

terrain, soils and alternative opportunities for the labor and equipment used. Figures labeled "**State**" represent the straight average of all reports used regardless of geographic location.

Of the 82 rates reported with year-to-year comparisons, 65 increased, 12 decreased, and 5 are virtually unchanged from last year. Overall, custom rates were up 4.45 percent compared to the previous year. Because of the potential variation in size and overall productivity of equipment, a range of reported rates for each job has been included. The range represents the middle 80 percent of all reported rates for each job, thus the lowest 10 percent and the highest 10 percent of all reported values were not published.

## Custom Rates: Selected Farming Operations, Pennsylvania, 2012-2013

| Job   | Basis of Charge | 2013 (Dollars)   |                |                    |        | 2012            |
|---|-----------------|------------------|----------------|--------------------|--------|-----------------|
|   |                 | Mountain Section | Valley Section | Range <sup>2</sup> | State  | State (Dollars) |
| <b>Harvesting:</b>                            |                 |                  |                |                    |        |                 |

<sup>1</sup> An "NA" is displayed for any service where too few reports were received to set an estimate, which occurred for several items in the Mountain Section. These reports, however, were still included in setting the State Estimate. <sup>2</sup> The range represents the middle 80 percent of all reported rates for each job, thus the lowest 10 percent and the highest 10 percent of all reported values were not published.
