Farm numbers and land in farms unchanged in Pennsylvania

The number of farms in Pennsylvania for 2022 is estimated at 52,700, unchanged from 2021, according to King Whetstone, director of USDA’s National Agricultural Statistics Service, Northeastern Regional Office. Total land in farms, at 7.30 million acres, was unchanged from 2021. The average farm size for 2022 is 139 acres, unchanged from the previous year.

Farm numbers and land in farms are differentiated by six economic sales classes. Farms and ranches are classified into these six sales classes by summing the sales of agricultural products and government program payments. Sales class breaks occur at \$10,000, \$100,000, \$250,000, \$500,000, and \$1,000,000. In 2021, the National Agricultural Statistics Service (NASS) implemented a statistical modeling approach to generate survey indications. This approach was in response to the impacts of the COVID-19 pandemic on data collection processes and the suspension of in-person data collection.
