PENNSYLVANIA PROCESSING VEGETABLES

HARRISBURG, PA--- Contracted production for Pennsylvania's snap beans for processing in 2015 is forecast at 39,410 tons, compared to 32,480 tons in 2014. Area contracted for harvest is estimated at 11,100 acres, up from 10,600 acres in 2014. The expected yield is 3.55 tons per contracted acre in 2015. In Pennsylvania, adequate and timely rainfall throughout the growing season coupled with moderate temperatures led to higher yields than last season.

The complete Vegetable Report and all other NASS reports are available online at www.nass.usda.gov.
