# CROPS SECTION

## 2011 SOUTH CAROLINA CROP SUMMARY

**JANUARY:** 2011 rolled in with areas of dense fog for much of the State. Mild air exited and was replaced by a cold front that arrived from the northwest. On January 10, snow began to fall from the upstate mountains into the southern midlands. Chesnee measured 13 inches of snow by January 11. High temperatures reached into the forties mid-month with rain and fog present in many areas of the State. A smaller cold weather system on January 24 produced light snow in the upstate and frost for the inland portions of the state. Milder weather arrived at the end of the month with the Columbia area measuring a high of 75 degrees on January 30. The State average temperature for the month was five degrees below normal with an average rainfall of 1.5 inches.

**FEBRUARY:** The first week of February began with cool, cloudy weather over much of the State. Freezing rain was reported in some counties and a wintry mix continued to fall through the end of the first week. Rainfall for the week was the heaviest weekly amount recorded since December 2009. Light snow continued to fall in the upstate and northern coastal areas through mid-month. Dry, mild air arrived along with warmer temperatures later in the month. On February 17, the State observed the first day without a freeze since October 6, 2010. A much drier and warmer end to February saw early flowering of bulbs and ornamental trees for much of the State. The State average temperature for the month was four degrees above normal with an average of 3.2 inches of rain.

**MARCH:** Cold weather returned the first week of March. Frost was observed in many counties and daytime temperatures did not exceed the sixties. Rain showers and high winds were observed during the first weekend in March, leading to more frost on March 7 and 8. A hard freeze of 25 degrees was reported on the morning of March 12 in Saluda and Pelion. A warming trend began in the afternoon and would continue for the remainder of the month. Rains were plentiful due to thunderstorms with some bringing severe weather and large hailstones. Temperatures in the high seventies were accompanied by high winds which led to some reports of wildfires in coastal counties. The State average temperature for the period was four degrees above normal with an average rainfall of 3.2 inches.

**APRIL:** The month began with turbulent weather during the first week of April. Near 90-degree heat helped fuel another round of storms on April 9. Mid- April brought average temperatures and very little rainfall. Some localities experienced damage to early field crops and orchards throughout the path of the hailstorm. Eighty-five percent of corn had been planted and forty five percent of tobacco was transplanted. Warm temperatures and scattered thunderstorms characterized the week ending April 24, 2011. Highs were in the 80's for much of the State all week. The state average temperature for the final week was six degrees above normal. The State average rainfall for the period was .4 inches.

**MAY:** The month began with warm temperatures across most of the State. Typical May weather began the week ending May 15th, 2011. The week ending May 22nd, began with cloudy, cooler weather and pockets of rainfall for most of the State. By late May, cotton planting was eighty six percent complete while peanut planting advanced to seventy five percent complete. Soybean planting reached fifty seven percent complete. Hot, dry weather dominated the final week of May. Sunny skies brought temperatures back into the 90's on Sunday. Winter wheat completely turned color, finishing well ahead of the five year average due to warmer temperatures. The State average rainfall for the period was 0.7 inches.

**JUNE:** The first week brought higher than normal temperatures and very little rainfall to the State. By mid-June, hot, dry weather contributed to lower yield potential for major crops. High temperatures and scattered thunderstorms characterized the week ending June 26th. The week began with temperatures in the triple digits for much of the State. The State average temperature for the period was four degrees above normal. Eighty six percent of corn had silked. Cotton planting was completed for the season, finishing on schedule with the five year average. Eighteen percent of peanuts had pegged, while soybean planting reached 94 percent complete, one point ahead of the five year average. Seventy eight percent of the crop had emerged. By the end of June, winter wheat harvest was 100 percent complete.

**JULY:** Crop conditions continued to show signs of decline. Much needed precipitation finally arrived in many areas of the State during the week ending July 10, 2011. Soybean planting was 98 percent complete. Eighty-nine percent of the crop had emerged. Record temperatures scorched much of South Carolina during the week ending July 17th, 2011. Four counties in the Midlands were upgraded to a moderate drought status while the two easternmost counties in the State were upgraded to severe drought status. Tobacco harvest continued with 50 percent of the crop harvested, while peach harvest reached 82 percent complete. Scattered showers brought some relief to moisture-starved crops in the period ending July 31st, 2011.

**AUGUST:** The trend of high temperatures and scattered thunderstorms continued in the week ending August 7th, 2011. Corn maturation levels remained far ahead of the 5 year average. Tobacco reached 80 percent harvested, while peaches topped 90 harvested. Relief from the heat finally arrived during the week ending August 21st, 2011. Crops and livestock were given a chance to recover with the cooler temperatures and improved soil moisture levels. Very little damage was reported in counties that experienced the outer bands of the hurricane. Armyworms continued to appear as farmers sprayed crops to attempt to control the outbreak. Ninety-five percent of cotton had set bolls by the end of the week. Ninety-four percent of soybeans had bloomed with 68 percent of the crop setting pods by the end of the week.

**SEPTEMBER:** Corn harvested reached 75 percent compared to the average of 58 percent. Tobacco harvested reached 88 percent compared to the 88 percent average. Ninety-six percent of cotton had set bolls by the end of the week, on pace with last year and two points behind the five year average. Soybeans bloomed reached 97 percent, just slightly below the 99 average. Significant amounts of rainfall finally fell over widespread areas of the State during the week ending September 25th, 2011. With the entire State in moderate drought status, the rain was a timely help to struggling crops and pastures. Severe weather moved into the State over the weekend leading to high winds and flash flooding in Columbia. The State average temperature for the period was four degrees above normal. The State average rainfall for the period was 2.9 inches.

**OCTOBER:** Cooler weather settled into the State during the week ending October 9th, 2011. Ninety-nine percent of corn had been harvested, on schedule with the five year average. Twenty-five percent of the cotton crop had been harvested. Peanut harvest picked up with 33 percent completed by the end of the week, 10 points behind the five year average. Wet, windy conditions were present throughout the State during the week ending October 16th, 2011. Rain stalled peanut and cotton harvests, but improved pasture and livestock conditions. Very little to no rain was observed during this period allowing peanut and cotton harvests to resume. The State average temperature for the period was two degrees below normal.

**NOVEMBER:** Cloudy and wet conditions ushered in the week ending November 6th, 2011. Cooler than normal temperatures accompanied light rainfall over most of the State on Monday. Many locations reported light frost in the early morning with minimal damage to crops. Unusually warm temperatures were observed during the week ending November 20th, 2011. Heavy rains and high winds moved with the system drenching many areas of the State. Much cooler temperatures arrived on Thursday. The State average temperature for the period was eight degrees above normal with 6 days suitable for fieldwork. The State average rainfall for the week of November 20 was .5 inches, but averaged 0.3 inches for the final week.

**DECEMBER:** December began with cool temperatures and sunny skies. Highs were in the fifties for most counties with a few southern counties in the low sixties. High temperatures on Friday, December 9th, retreated back into the 50's and settled into that range for the weekend. A string of unseasonably high temperatures continued on Friday, December 16<sup>th</sup>. Christmas Day Sunday began with partly cloudy skies, then periods of light rain for central South Carolina and eastward to the coast. The State average temperature for the seven-day period was nine degrees above normal. The State average rainfall for the period was 0.6 inches. A boundary passed through the State overnight with periods of heavy rain and a few reports of thunder. A gradual warming trend started on Friday, December 30th and continued through the end of the year.

<sup>1/</sup> South Carolina makes estimates for vegetable commodities, fresh market and processing, through the Federal Estimates Program. <sup>2/</sup> Yield and production in tons; price in dollars per ton.

**MUSHROOMS:** South Carolina participates in the Annual Mushroom Survey, however due to established agency guidelines, data are included in other states.

## GRAIN STORAGE CAPACITY Off-Farm and On-Farm

Capacity of **Off-Farm** commercial grain storage totaled 19.5 million bushels in SOUTH CAROLINA on December 1, 2011, eleven percent above December 1, 2010. With this capacity, South Carolina ranks 35<sup>th</sup> in the United States.

Off-farm grain storage facilities in South Carolina totaled 53 on December 1, 2011, unchanged from December 1, 20109.

**On-Farm** storage capacity is not published for South Carolina.

# **NURSERY, FLORICULTURE, HORTICULTURE AND TURFGRASS**

## **FLORICULTURE**

Total crop value of all floriculture crops for all South Carolina growers with \$10,000 or more in sales in 2011 was estimated at \$88.0 million, down 6 percent compared to \$93.4 million in 2010. There were 78 growers in 2011, down from 87 in 2010. Total covered area for floriculture crop production was recorded at 3.97 million square feet, down from 5.51 million square feet in 2010. Total greenhouse space covered area at 3.42 million square feet was down from 2010's 4.84 million square feet.

Growers with \$100,000 plus in total sales posted a wholesale value of plant production during 2011 of \$85.5 million, down from \$90.3 million in 2010. The wholesale value of bedding and garden plants, the largest part of production, totaled \$75.6 million, down from \$77.7 million in 2010.

Excludes lime. <sup>3/</sup> Totals may not add due to rounding.

## FARM NUMBERS AND LAND IN FARMS

The number of farms in SOUTH CAROLINA in 2011 is estimated at 26,500, down 300 from 26,800 in 2010 and down 500 from the 27,000 in 2009. Total land in farms for 2011 is 4.90 million acres, unchanged from 2010 and 2009. The average size of farms in 2011 was 185 acres, up 2 acres from 2010, and up 4 acres from 2009. Farms with \$100,000 or more in sales totaled 2,200 in 2011, accounting for 8.3 percent of all farms. Farms with \$100,000 or more in sales in 2010 totaled 2,100 and 2,000 in 2009.

The number of farms in the United States in 2011 is estimated at 2.2 million, down slightly from 2010. Total land in farms, at 917 million acres, decreased 1.85 million acres from 2010. The average farm size is 420 acres, up 1 acre from the previous year. The average farm size increased 1 acre in 2011 to 420 acres per farm. However, average farm sizes declined in some of the sales classes partially due to smaller farms moving up to higher sales classes.

A **farm** is defined as any establishment from which \$1,000 or more of agricultural products were sold or normally would be sold during the year. Government payments are included in sales. Institutional farms experimental and research farms, and Indian Reservations are included as farms. Places with their entire acreage enrolled in the Conservation Reserve Program, set aside, or other government programs are considered operating farms if they receive \$1,000 or more in payments. Operations with 5 or more horses or ponies and no other agricultural sales are also counted as farms. Operations with fewer than 5 equine and at least \$1,000 in agricultural sales qualified as farms.

**Land in farms** is all land operated by farms during the year. It includes crop and livestock acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set aside or commodity acreage programs. It excludes all public, industrial, and grazing association land. It excludes all land operated by establishments not qualifying as farms.

**Number of Farms and Land in Farms: Economic Sales Class, SOUTH CAROLINA, 2009 - 2011 <sup>1/</sup>**

Year	Number of Farms		Land in Farms		Number of Farms		Land in Farms	
	\$1,000 - \$9,999		\$10,000 - \$99,999		\$100,000 & Over		Total	
	Number	Thou. Acres	Number	Thou. Acres	Number	Thou. Acres	Number	Thou. Acres
2009	19,600	1,800	5,400	1,300	2,000	1,800	27,000	4,900
2010	19,200	1,700	5,500	1,300	2,100	1,900	26,800	4,900
2011 <sup>2/</sup>	18,100	1,550	6,200	1,450	2,200	1,900	26,500	4,900

<sup>1/</sup> Based on the gross value of sales, which includes sales of agricultural products such as crops, livestock, horses, honey, furs, fish, nursery and greenhouse products, rabbits, etc. Government program payments from the previous year are also included. <sup>2/</sup> Preliminary.

**Number of Farms, Land in Farms, and Average Size, SOUTH CAROLINA and NATION, 2009 - 2011 <sup>1/</sup>**

Year	South Carolina			United States		
	Number of Farms	Land in Farms	Average Size of Farm	Number of Farms	Land in Farms	Average Size of Farm
	- Thousand -	- Thou. Acres -	- Acres -	- Thousand -	- Thou. Acres -	- Acres -

## ALL CATTLE AND CALVES

The South Carolina cattle industry had a total of 370,000 cattle and calves as of January 1, 2012. There were a total of 184,000 beef cows and 16,000 milk cows in the inventory.

The 2011 calf crop totaled 160,000 head, down 5,000 head from 2010 and 2009.

South Carolina ranked 39<sup>th</sup> in the Nation for all cattle and calves, with Texas ranked 1<sup>st</sup>, Nebraska ranked 2<sup>nd</sup>, Kansas ranked 3<sup>rd</sup>, and California ranked 4<sup>th</sup>. The leading county in South Carolina was Anderson, followed by Saluda, Newberry, Laurens and Chester.

## MILK PRODUCTION

### Average Number of Cows Milked during Year, Production, and Marketings, SOUTH CAROLINA, 2009 - 2011

Year	Average Number of Cows Milked	Production of Milk		Marketings of Milk & Cream		
		Production Per Cow <sup>1/</sup>	Milk Production	Milk Utilized	Average Returns Per Cwt.	Cash Receipts from Marketing
	- Thou. Head -	- Pounds -	----- Thou. Lbs. -----	- Dollars -	- Thou. Dol.-	
2009	17	19,000	323,000	320,000	15.90	50,880
2010	16	17,875	286,000	283,000	19.90	56,317
2011	16	17,375	278,000	275,000	22.80	62,700

<sup>1/</sup> Milk production per cow includes all milk produced (excluding milk sucked by calves) divided by average number of cows milked (including milk cows used only for subsistence and milk cows that are dry).

## MANUFACTURED DAIRY PRODUCTS

South Carolina data was not published for Manufactured Dairy Products, which includes Blue Cheese, Ice Cream Mix, Low fat Ice Cream Mix, Sherbet Mix, and Frozen Yogurt Mix for the years 2009 and 2010. There were 2 plants in operation during the year 2010. State data is not published when fewer than 3 plants report a commodity or if individual plant operations could be disclosed.

## GOATS

### Meat and Other, and Milk Goats, Number by Class, South Carolina, January 1, 2011 and 2012

Year	Meat and Other Goats	Milk Goats
		--- Head ---
2011	42,500	2,800
2012	43,500	3,000

## BEES AND HONEY

South Carolina estimates were not published separately to avoid disclosing data for individual operations for the 2011 survey.

## HOG AND PIG INVENTORY

SOUTH CAROLINA hog production in 2011 totaled 210,000 head. This was 9 percent below the 230,000 head in 2010, and 7 percent below the 225,000 head in 2009.

South Carolina ranked 23<sup>st</sup> in the nation for total hogs & Pigs in 2010 with Iowa 1<sup>st</sup>, North Carolina 2<sup>nd</sup>, and Georgia 27<sup>th</sup>. Within the State, Dillon County ranked 1<sup>st</sup> followed by Horry, Orangeburg and Marlboro counties.

## BROILERS RAISED

SOUTH CAROLINA broiler producers raised 223,400,000 broilers in 2011. This was 7 percent below the 2010 total of 241,000,000 and 6 percent below the 237,800,000 in 2009. Pounds produced totaled 1,496,800,000 in 2011, down 4 percent from 2010 and 2 percent below 2009. The average price received for broilers in 2011 was 47.0 cents per pound liveweight equivalent, down 1.0 cent from 2010, but up 1.0 cent from 2009. Value of production, which includes home

consumption, was \$697,509,000, down 7 percent from 2010's \$750,476,000 and less than 1 percent above 2009's value of \$695,508,000. On a county wide basis during 2011, Oconee, Lexington, Aiken, Orangeburg, and Saluda, were the leading broiler-producing counties in the State. South Carolina ranks 11<sup>th</sup> in the Nation with Georgia holding the top spot and Arkansas placing 2<sup>nd</sup>, Alabama 3<sup>rd</sup>, North Carolina 4<sup>th</sup>, and Mississippi 5<sup>th</sup>.

## CASH RECEIPTS

Preliminary cash receipts from farm marketings in South Carolina during 2011, including government payments, totaled \$2,708,753,000. The \$2.7 billion is 7 percent (\$167 million) above 2010 and 16 percent (\$370 million) above 2009. Government payments for 2011 were \$114 million, in comparison to \$125 million in 2010 and \$151 million in 2009. The number one commodity in terms of cash receipts during 2011 was broilers, accounting for 26.9 percent of the total, excluding government payments.

CROPS cash receipts, at \$1,177 billion, accounted for 45.4 percent of the total commodity cash receipts during 2011 compared with 43.2 percent in 2010 and 42.9 percent in 2009. Preliminary 2011 crops cash receipts increased \$131 million from 2010 and up \$238 million from 2009. Greenhouse/nursery/floriculture, cotton and corn were the top three crop commodities in 2011 in terms of cash receipts.

LIVESTOCK AND LIVESTOCK PRODUCTS, with cash receipts of \$1,418 billion in 2011, accounted for 54.6 percent of the commodity total compared to 56.7 percent in 2010 and 57.1 percent in 2009. Livestock receipts are up \$48 million from 2010 and up \$168 million from 2009. Broilers, turkeys, and cattle and calves were the top three commodities.

1/ Source Data - South Carolina Forestry Commission - Revised April 2011. Data not available until later this year. 2/ USDA Forest Service, 2009 forest inventory data (40% Cycle 9 / 60% Cycle 10) includes private individuals, families, corporations, TIMO, REIT, LLC, forest industry, and public ownerships. 3/ Stumpage is value paid to landowner for trees, excluding harvesting costs. Monetary values derived from Timber Mart-South, Frank W. Norris Foundation, Athens GA, 2009. 4/ Delivered roundwood value of timber to the mill. Timber production data is collected by the SC Forestry Commission as part of the USDA Forest Service, 2009 TPO survey. Data compiled April 2011 by Byron Rominger, Forest Inventory Coordinator, South Carolina Forestry Commission, Phone 803-896-8804.

<sup>1/</sup> Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. <sup>2/</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. SOURCE: Economic Research Service – USDA

## COUNTY DATA

The following section highlights each county in South Carolina. Crops produced, livestock and livestock products, and agricultural cash receipts are displayed with the appropriate rank among all counties in South Carolina. Equal estimates were assigned the same rank. Data published here are available elsewhere in this bulletin, but this section consolidates each county.

Below is a table with data for the entire State, including South Carolina's ranking nationwide. In the following pages each county is listed alphabetically.

The Cash Receipt data for the State and Counties is taken from the Economic Research Service, USDA data source.

### SOUTH CAROLINA

# CLEMSON COOPERATIVE EXTENSION SERVICE OFFICES

The Extension Service provides informal education to residents of South Carolina as a function of the land-grant University. An office is located in each county. Its mission is to provide sound, scientifically-based information to South Carolinians and help them use that information to improve the quality of their lives. Major programming areas include agriculture and natural resources, home economics and family life, youth development and 4-H, and community development.

County	Street Address	Mailing Address	Area Code	Telephone Number

---

South Carolina Agricultural and Forestry Research System is a cooperative program funded from federal and state funds.

Programs of the SCAFRS in cooperation with South Carolina State University and the U. S. Department of Agriculture are offered to people of all ages, regardless of race, color, sex, religion, national origin, disability, political beliefs, sexual orientation, or marital or family status. The SCAFRS is an equal opportunity employer.
