

January 2, 2020

South Carolina: Temperatures averaged 42.8 to 56.4 degrees Fahrenheit throughout the state last month. Total precipitation ranged from no rain in some places to 13.75 inches in Charleston County. There was frequent rainfall throughout the month. Wet weather kept producers out of the field at times. Field crops were mostly harvested with a small amount of cotton remaining in the fields. Winter greens were being harvested and in good condition due to adequate rainfall and mild temperatures. Wheat and winter grazing forages were in good condition and progressing well due to adequate rainfall.
