SOUTH DAKOTA CROP PROGRESS AND CONDITION

Sioux Falls, SD – For the week ending August 7, 2016, winter wheat harvest neared completion following a mostly dry week, according to the USDA’s National Agricultural Statistics Service. Harvest of other small grains also advanced. Scattered showers and thunderstorms brought much needed precipitation to parts of northeast, east central and western South Dakota. Damage from wind and hail was also reported with some storms. However, soil moisture ratings declined as a majority of the State remained dry for the week. There were 6.3 days suitable for fieldwork. Topsoil moisture supplies rated 14 percent very short, 38 short, 47 adequate, and 1 surplus. Subsoil moisture supplies rated 11 percent very short, 41 short, 48 adequate, and 0 surplus.

Field Crops Report: Winter wheat harvested was 92 percent, ahead of 87 last year and the five-year average of 81.
