

Tennessee Crop Weather

Tennessee Field Office • PO Box 40627 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday 3:00 PM; November 16, 2020

For the Week Ending November 15, 2020

FIELD CROP HARVEST AND WHEAT SEEDING PREVALENT STATEWIDE

West Tennessee producers can see the end of harvesting soybeans and corn and seeding wheat. There is little to no corn standing. In Middle Tennessee, rain slowed producer’s fieldwork for one day and the rest of the week was favorable for tending crops. In Middle Tennessee, there were still several acres of soybeans and corn still standing and wheat to be seeded. East Tennessee producers were slowed by over two inches of rain last week and harvested corn and soybeans as weather allowed. Fescue is growing due to mild temperatures. There were 5.6 days suitable for fieldwork last week. Subsoil moisture rated 8 percent short, 85 percent adequate, and 7 percent surplus. Topsoil moisture rated 8 percent short, 84 percent adequate, and 8 percent surplus.

CROP PROGRESS					CONDITION					
Crop	This Week	Last Week	2019	5 Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent
	Percent					Percent				
Corn – Harvested for Grain	99	97	100	99	Pasture	2	9	35	47	7
