Most of the state received from trace amounts to upwards of 1.5 inches of precipitation. Some areas in the Low Plains, the Upper Coast, South Central Texas, and the Coastal Bend received up to 2.0 inches. There were 6.3 days suitable for fieldwork.

Small Grains: Winter wheat harvested for grain reached 58 percent, down 25 points from the previous year and down 10 points from normal. Winter wheat harvest in the Low Plains was nearing completion. Oats harvested for grain reached 76 percent, down 14 points from the previous year and down 6 points from normal. Small grain harvest in the Blacklands was nearing completion. Farmers across the state continued cutting and baling hay.

Row Crops: Corn silking reached 57 percent, up 2 points from the previous year and up 6 points from normal. Cotton squaring reached 17 percent, down 9 points from the previous year and down 4 points from normal. Irrigated cotton in the Northern Low Plains was progressing well. Cotton was progressing well in the Blacklands with recent favorable weather. Cotton fields were being sprayed for weeds in the Edwards Plateau. Peanuts planted reached 80 percent, down 9 points from the previous year and down 13 points from normal. Peanut planting in some areas of the Southern High Plains and South Texas was wrapping up. Rice headed reached 19 percent, down 3 points from the previous year but up 2 points from normal. Sorghum coloring reached 36 percent, down 1 point from the previous year but up 3 points from normal. Grain sorghum and corn in the Lower Valley was steadily progressing. Soybeans blooming reached 38 percent, up 12 points from the previous year and up 9 points from normal. Sunflowers planted reached 70 percent, down 6 points from the previous year and down 9 points from normal.

Fruit, Vegetable and Specialty Crops: Vegetable, watermelon, blueberry, blackberry, and peach harvest progressed in North East Texas. Insects were reported in the Edwards Plateau and South Texas in some pecan orchards. Fruit and vegetables were being irrigated in the Trans-Pecos.

Livestock, Range and Pasture: Insect's continued bothering livestock in the Blacklands, North East Texas, and South Central Texas. Producers in the Trans-Pecos worked to keep livestock hydrated. Pasture and range condition was rated mostly good to fair, although conditions varied across the state.

1 The formula for the condition index is \( I = (5V + 25P + 60F + 90G + 110E)/100 \) where \( I \) = crop condition index and \( V, P, F, G, E \) = percentage of crop rated very poor, poor, fair, good, excellent.
