This report contains the results from the July 2018 Chicken and Egg Survey. The estimates in this report are based on a monthly survey of contractors and independent producers who have at least 30,000 laying hens for table egg and/or hatchery supply. We would like to thank all producers whose responses to the survey made these estimates for Texas possible. Results from the next monthly survey will be made available on August 21, 2018.

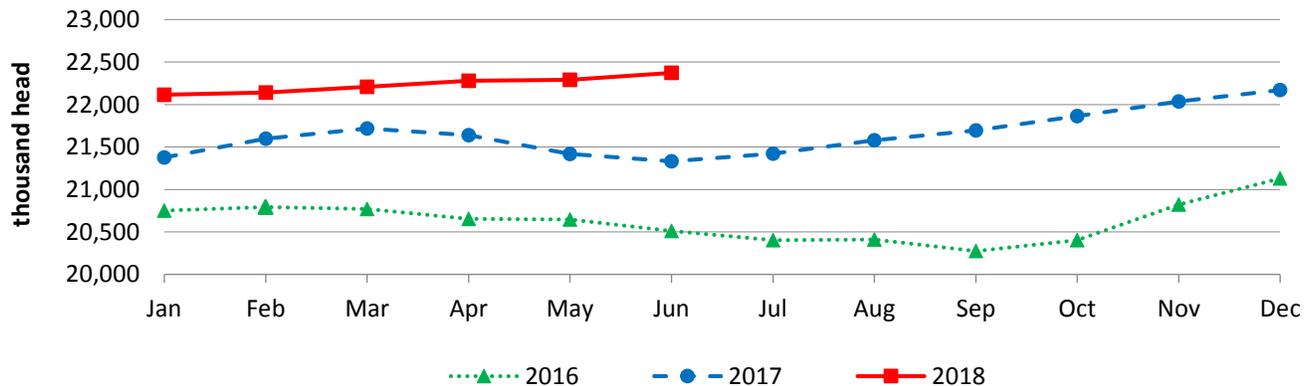

June 2018 egg production in Texas totaled 485 million eggs, up 3 percent from June 2017, but down 4 percent from May 2018.

Texas Monthly Egg Production

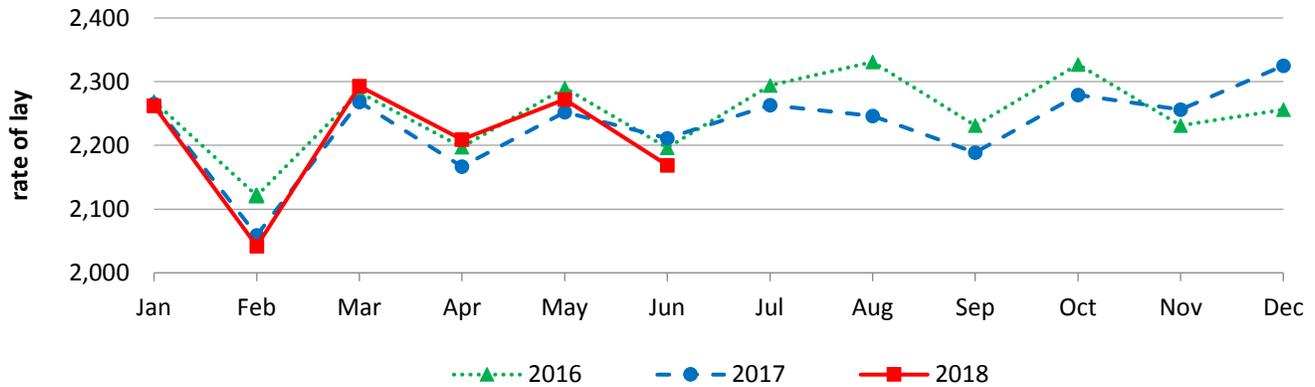

The number of layers during June 2018 averaged 22.4 million, 5 percent higher than last year, and slightly higher than May 2018. Egg production per 100 layers averaged 2,169 eggs, down from last year's 2,211 eggs, and down from last month's 2,272 eggs.

Texas Average Layers During the Month

Texas Monthly Eggs Produced Per 100 Layers

U.S. Highlights: United States egg production totaled 8.83 billion eggs during June 2018, 2 percent above a year ago. Production included 7.67 billion table eggs, 1.08 billion broiler-type hatching eggs and 79.4 million egg-type hatching eggs. Nationally, the total number of layers averaged 386 million during June 2018, up 4 percent from a year ago. Production per 100 layers was 2,289 eggs during June, down 1 percent from last year.

The U.S. monthly hatch of egg-type chicks totaled 53.9 million, 8 percent higher than June 2017. The hatch of broiler-type chicks, at 821 million, was 2 percent higher than June of last year. The leading U.S. breeders placed 9.33 million broiler-type pullet chicks for future domestic hatchery supply flocks during June 2018, up 13 percent from June 2017.

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.
