The June acreage estimates in this report are based primarily on surveys conducted the first two weeks of June. These surveys are based on a probability area frame survey with a sample of approximately 1,300 segments or parcels of land (average approximately 1 square mile) in the Southern Plains region and a list probability sample of 6,000 farm operators. Data were collected by mail, internet, and telephone interview to obtain information on these operations.

Data provided by Oklahoma and Texas operators are the foundation of the estimates made for the Southern Plains region. The Southern Plains Regional Field Office would like to thank all farmers and ranchers that responded to these surveys and provided data used to set these important estimates.

## WINTER WHEAT

**Oklahoma winter wheat** planted, at 4.30 million acres, is up 1 percent from a year ago. Harvested acreage, at 2.70 million, is up 4 percent from last year's crop.

**Texas winter wheat** planted, at 5.60 million acres, is up 14 percent from a year ago. Harvested acreage, at 2.25 million, is up 10 percent from a year ago.
