

# *Ranking: Utah Top Five Counties by Commodity*

County Estimates are an integral part of agricultural statistics. These estimates provide data to compare acres, production, and yield in different counties within the State of Utah. Crop county estimates play a major role in Federal Farm Program payments and crop insurance settlements, thus, directly affecting many farmers and ranchers. A cooperative agreement between the Utah Department of Agriculture and Food and the Utah Agricultural Statistics Service, USDA provides funding in support of county estimates contained in this publication.

County estimates may be downloaded in .CSV file format by accessing the NASS homepage at <http://www.nass.usda.gov/> under (QuickStats state and county data).” Additional County level data can be found in the 2007 Census of Agriculture at <http://www.agcensus.usda.gov/>.

		<b>Wheat, All</b>		<b>Barley, Barley – All</b>
