NASS prepares and publishes crop annual county data to support the USDA farm programs. The annual county data are based on reports from a sample of farms and ranches. For wheat, barley, and oats, the September Acreage and Production survey is supplemented with a County Agricultural Production survey.

It may not be possible to publish information for all counties. NASS adheres to strict publication standards to avoid disclosure of individual operations. A minimum number of reports and/or coverage level must be met for a county's data to be published.

Small grain county estimates are released in early December each year. NASS also releases the data in our Quick Stats searchable database: <http://quickstats.nass.usda.gov/>

The expected release dates for future 2020 crop county estimates is as follows:
