

Wisconsin had 3.4 days suitable for fieldwork for the week ending April 21, 2024 according to the USDA’s National Agricultural Statistics Service. Wet and cool conditions continued to delay significant row crop planting in most of the state. Field activities included spring tillage, readying equipment, alfalfa planting, potato planting, oat seeding, manure hauling, and fertilizer application as conditions allowed. Some scattered corn and soybean planting was reported in southern Wisconsin.

Topsoil moisture condition rated 5 percent very short, 16 percent short, 69 percent adequate and 10 percent surplus. **Subsoil moisture** condition rated 5 percent very short, 23 percent short, 64 percent adequate and 8 percent surplus.

Oat planting progress was 19 percent complete, 5 days ahead of last year and 1 day ahead of the 5-year average. Emergence has begun and was 7 percent complete.

Potato planting was 25 percent complete. This was 1 week ahead of last year and 5 days ahead of average.

Spring tillage was 22 percent complete, 9 days ahead of last year and 3 days ahead of average.

Winter wheat condition was rated 82 percent good to excellent statewide, up 4 percentage points from last week.

Pasture and range condition was rated at 37 percent good to excellent statewide, up 5 percentage points from last week.

Crop Condition as of April 21, 2024

Item	Very Poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
