Cooperating with Wisconsin Department of Agriculture, Trade and Consumer Protection

November 25, 2024 - For Immediate Release

Media Contact: Greg Bussler

Wisconsin had **3.9 days suitable for fieldwork** statewide for the week ending November 24, 2024, according to the USDA’s National Agricultural Statistics Service. Much of the state experienced rain or snow, slowing progress on remaining field activities. Fieldwork included late corn harvest, manure and fertilizer applications, fall tillage, and cranberry bog maintenance.

Topsoil moisture condition rated 1 percent very short, 18 percent short, 72 percent adequate and 9 percent surplus. **Subsoil moisture** condition rated 7 percent very short, 29 percent short, 60 percent adequate and 4 percent surplus.

Corn for grain was 97 percent harvested, remaining well ahead of last year and the 5-year average.

Ninety-seven percent of the **winter wheat** crop has emerged. Winter wheat condition was rated 74 percent good to excellent, up 1 percentage point from last week. **Fall tillage** was 86 percent complete.

Crop Condition as of November 24, 2024

Item	Very Poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Wheat, winter	0	2	24	58	16

This is the final weekly *Wisconsin Crop Progress and Condition* report of the season. The USDA’s National Agricultural Statistics Service would like to thank the many farmers and FSA, NRCS, and agribusiness personnel who provided the information for this report each week. The new season of *Wisconsin Crop Progress and Condition* is scheduled to begin April 7, 2025.

The complete report can be found on the USDA NASS website at www.nass.usda.gov/Publications.
