Winter wheat production in Wisconsin is forecast at 20.5 million bushels, 32 percent above last year's 15.5 million bushels according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of May 1, the State's winter wheat yield is forecast at 76 bushels per acre, an increase of 2 bushels per acre from last year. If realized, this will be Wisconsin's second highest winter wheat yield, behind the record high of 78 bushels per acre set in 2006. Wisconsin winter wheat growers intend to harvest 270,000 acres for grain, up 29 percent from 2015.
