Winter wheat production in Wisconsin is forecast at 20.5 million bushels, 32 percent above last year's 15.5 million bushels according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of June 1, the State's winter wheat yield is forecast at 76 bushels per acre, an increase of 2 bushels per acre from last year. If realized, this will be Wisconsin's second highest winter wheat yield, behind the record high of 78 bushels per acre set in 2006. Wisconsin winter wheat growers intend to harvest 270,000 acres for grain, up 29 percent from 2015.

Winter Wheat Production - Wisconsin  
2007-2016

The estimates in this report are based on June 1 conditions and do not reflect weather effects since that time. The next crop production forecast, based on conditions as of July 1, will be released on July 12
