Wisconsin corn production is forecast at 534 million bushels according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of November 1, yields are expected to average 184 bushels per acre, down 2 bushels from the October 1 forecast but up 18 bushels per acre from last year. Corn planted acreage is estimated at 4.00 million acres. An estimated 2.90 million acres will be harvested for grain.

Soybean production is forecast at 105 million bushels. The yield is forecast at 53.0 bushels per acre, down 2.0 bushels from the October 1 forecast but up 6.0 bushels per acre from last year. Soybean planted acreage is estimated at 2.00 million acres with 1.98 million acres to be harvested.

Potato production is forecast at 28.3 million hundredweight (cwt), down 1% from 2019. The potato yield is forecast at 410 cwt per acre, unchanged from 2019. Wisconsin potato growers expect to harvest 69,000 acres, down 1,000 acres from last year.

The forecasts in this report are based on November 1 conditions and do not reflect weather effects since that time. The next corn and soybean production estimates will be published in the *Crop Production – Annual Summary* report which will be released January 12, 2021.

Area Harvested, Yield, and Production – Wisconsin and United States: 2019 and Forecasted November 1, 2020

United States Summary

Corn production for grain is forecast at 14.5 billion bushels, down 1% from the previous forecast but up 7% from 2019. Based on conditions as of November 1, yields are expected to average 175.8 bushels per harvested acre, down 2.6 bushels from the previous forecast but up 8.3 bushels from last year. Area harvested for grain is forecast at 82.5 million acres, unchanged from the previous forecast, but up 1% from the previous year.

Soybean production for beans is forecast at 4.17 billion bushels, down 2% from the previous forecast but up 17% from last year. Based on conditions as of November 1, yields are expected to average 50.7 bushels per harvested acre, down 1.2 bushels from the previous forecast but up 3.3 bushels from 2019. Area harvested for beans in the United States is forecast at 82.3 million acres, unchanged from the previous forecast but up 10% from 2019.
