¹ Includes dry cows, excludes heifers not yet fresh.

² Excludes milk sucked by calves.

United States Milk Production

Milk production in the 24 major States during May totaled 18.1 billion pounds, down 0.1 percent from May 2018. April revised production, at 17.6 billion pounds, was up 0.5 percent from April 2018. The April revision represented an increase of 195 million pounds or 1.1 percent from last month's preliminary 23-State production estimate.

Production per cow in the 24 major States averaged 2,062 pounds for May, 11 pounds above May 2018.

The number of milk cows on farms in the 24 major States was 8.79 million head, 55,000 head less than May 2018, but 5,000 head more than April 2019.

Monthly Milk Production – 24 Selected States

Special Note

NASS added Georgia to the monthly estimating program beginning with this report. For comparison purposes, historic estimates for Georgia and the 24 States from January 2018 to March 2019 were populated to Quick Stats. The change to a 24-State total accounted for 157 million of the 195 million pound revision to the 23-State production total for April 2019. The remaining 38 million pounds, or 0.2 percent, were a result of the normal revision process.
