Dear Reader,

The Wyoming Business Council Agribusiness Division is pleased to continue our partnership with Wyoming NASS to bring you this edition of *Wyoming Agricultural Statistics*. This has been another good year for agriculture, and we certainly hope the trend continues.

The primary function of the Agribusiness Division is to assist farmers, ranchers and agribusinesses develop and expand domestic and international marketing opportunities; enhance business development skills; and advance leadership skills and personal development. Specific Wyoming Business Council Agribusiness Division programs include:

- **Ag Business Development Program** helps increase financial sustainability of agribusinesses and recruits new agribusiness companies to Wyoming, and connects ag producers to consumers and businesses.
- **Beginning Producer Assistance** helps link veteran farmers and ranchers with those wanting to get a start in production agriculture.
- **Crop and Forage Promotion Program** assists crop producers identify alternative crops and marketing opportunities and promotes Wyoming's premium quality hay.
- **Farmers Market Program** promotes community farmers markets and provides assistance to new and existing market managers and agriculture producers.
- **Food Export Program** enhances marketing opportunities for Wyoming ag producers and food processors in the national and international marketplace.
- **Income Diversification Program** provides consulting to ag producers interested in diversifying their income to sustain their farming and ranching operations.
- **Livestock Genetics Program** assists seedstock producers promote their livestock in the domestic and international marketplace through consultation and one-on-one market plan development.
- **Livestock and Meat Marketing Program** assists producers capture additional value from their livestock and includes a source and age and natural verification program for livestock. The Wyoming Premium Heifer program promotes commercial bred heifers and replacement heifers.
- **Wyoming L.E.A.D. Program** develops leadership skills and expands the knowledge base for ag producers and agribusiness professionals who are interested in shaping Wyoming agriculture and rural communities.

The Agribusiness Division sponsors various educational programs, workshops and trade events for Wyoming ag producers throughout the year. In addition, the Division publishes a quarterly *AGtivities* newsletter and has an on-line agribusiness directory. To learn more about our programs, go to the Business Council website at [:www.wyomingbusiness.org/business/agri](http://www.wyomingbusiness.org/business/agri).

We constantly strive to meet the changing needs of the producers in the state, so don't hesitate to contact me with your ideas of how we can assist you in "Growing Wyoming Agriculture."

With warm regards,

Cindy Garretson-Weibel, Agribusiness Director
Wyoming Business Council

"Growing Wyoming Agriculture"

United States Department of Agriculture
National Agricultural Statistics Service
Wyoming Field Office

Cooperating with Wyoming Business Council and Wyoming Department of Agriculture

Dear Farmers, Ranchers, and Other Users of Wyoming Agricultural Data,

Congratulations on 125 years of Wyoming Statehood! The “2015 Wyoming Agricultural Statistics” bulletin honors the hard work and dedication of Wyoming ranchers and farmers since Wyoming became a state in 1890.

The National Agricultural Statistics Service (NASS) publishes over 500 reports nationwide throughout the calendar year. This book is a compilation of the Wyoming current and historic data included in all of those reports. A calendar showing report release dates can be found on the NASS website at: <http://www.nass.usda.gov/Publications/index.asp>

Wyoming farmers, ranchers, and agribusinesses voluntarily provide their individual information which is then summarized to the National, State, and County level. This publication would not be possible without their continued cooperation and support. I thank them all for sharing their valuable information with NASS, their fellow agricultural producers, and the general public. Not only do they grow our food, but they also play a vital role in helping NASS measure the food supply grown in the United States.

The free distribution of this publication would not be possible without funding from the Wyoming Business Council, Agribusiness Division under the direction of Cindy Garreston-Weibel. If you enjoy this publication, please let our great sponsors at the Wyoming Business Council know.

I would also like to thank our dedicated office staff and enumerators who talk to the farmers and ranchers all across Wyoming. In addition, the employees of USDA’s Farm Service Agency, Natural Resources Conservation Service, and the University of Wyoming County Extension staff provide valuable input to our programs that is greatly appreciated.

In addition to the information in this bulletin, a vast amount of detailed State and County information about Wyoming agriculture is available from the multitude of annual reports we publish and the 2012 Census of Agriculture. For more information, please visit our website at: <http://www.nass.usda.gov>

Sincerely,

Rhonda Brandt
State Statistician

WYOMING AGRICULTURE 2014

The value of the agricultural sector output in Wyoming totaled \$2.2 billion in 2014 and has been above the \$1 billion threshold since 2003. In 2014, 11,700 farms and ranches operated in Wyoming with a total land area of 30.4 million acres. Wyoming ranked 11th nationally in total land in farms and ranches and 1st in average size of farms and ranches. The cattle industry is by far the largest component of Wyoming agriculture accounting for over half of all cash receipts. Cattle also led the way in 2014 in terms of value of production at \$937 million. All livestock production was valued at \$1.0 billion, up 32 percent from 2013.

Hay is by far the leading crop in Wyoming in terms of value of production totaling \$309 million in 2014. Ranking second was **barley** at \$43.5 million. **Sugarbeets** had the third highest crop value in 2014 with an estimated \$41.0 million, followed by **corn** at \$31.5 million, **winter wheat** at \$26.9 million, and **dry beans** at \$26.8 million. All crop production totaled \$480 million in 2014, down 11 percent from 2013.

Cattle and calves inventory on January 1, 2015 totaled 1.30 million head with an inventory value of \$2.77 billion. Cattle inventory was up 2 percent from January 1, 2014. The January 1, 2015 inventory of **sheep and lambs** was down 3 percent from last year at 345,000 head, valued at \$72.8 million. The January 1, 2015 breeding sheep inventory was down 5,000 head and the market sheep and lamb inventory was also down 5,000 head from the previous year. All **hogs and pigs** inventory decreased 8 percent to 83,000 head on December 1, 2014 and was valued at \$13.3 million. Hogs kept for breeding decreased 9 percent from 2013, while market hogs decreased 4,000 head.

1/The average rates are estimates based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Cattle Survey.

2/Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aum = cow-calf x 0.833).

3/Eleven states: AZ, CA, CO, ID, MT, NV, NM, OR, UT, WA, and WY.

4/Sixteen states: Previous eleven plus KS, NE, ND, OK, and SD.

Net Farm Income	166.1	138.5	204.4	553.9	145.7	270.1

1/Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/A positive value of inventory change represents current year production not sold by December 31. A negative value is an offset to production from prior years included in current year sales.

LIVESTOCK

The number of **cattle and calves** on Wyoming farms and ranches on January 1, 2015, was 1,300,000 head, 2 percent above last year. The inventory of beef cows was unchanged at 694,000 head. Beef cow heifers kept for replacement increased 5 percent to 183,000 head. The remaining total beef cattle inventory, accounted for by other heifers, steers, bulls and all calves (under 500 pounds), increased by 2 percent from the previous year. The 2014 calf crop, at 660,000 calves, was up 3 percent compared to 2013. The 2014 U.S. market year average price per cwt. received for steers & heifers was \$154.00, up from \$126.00 in 2013. The 2014 market year average price of calves was \$264.00, up by 46 percent for the U.S. from 2013.

The number of **milk cows** in Wyoming herds during 2014 averaged 6,000 head, unchanged from a year ago. Wyoming milk cow price per head during 2014 averaged \$1,650.00, compared to \$1,440.00 a year ago.

The number of **hogs and pigs** in Wyoming on December 1, 2014 was 83,000 head, down 7,000 head from a year earlier. Breeding inventory decreased to 33,000 head. Market hogs and pigs decreased 4,000 head to 51,000 head. The 2014 pig crop totaled 776,000 pigs, up 2 percent from 2013. The 2014 U.S. market year average price per cwt. for all hogs was \$76.50, up \$9.30 per cwt. from the previous year.

Sheep and lamb inventory in Wyoming on January 1, 2015 totaled 345,000 head, down 10,000 head from the previous year. Total breeding stock inventory was down 5,000 head from the previous year to 260,000. The 2014 lamb crop totaled 240,000 lambs, up 15,000 head from 2013. The Wyoming average inventory value of all sheep in 2015 was up \$29.00 from 2014 to \$211.00.

Wyoming sheep producers lost 12,700 sheep and lambs to predators in 2014, down 27 percent from 2013. Coyotes were again the biggest predator taking 64 percent of the total predator losses and 27 percent of all losses. Losses to weather, disease, and other non-predator causes decreased by 1,400 head to 17,300. Sheep producers lost an estimated \$4.9 million due to sheep and lamb deaths in 2014, down from \$5.7 million the previous year.

Wyoming sheep and lambs produced 2.30 million pounds of wool in 2014, down 6 percent from 2013. The 2014 weight per fleece was up 7 percent at 9.2 pounds. The wool price per pound averaged \$1.97, down from \$2.13 in 2013.

The number of **chickens** in Wyoming flocks on December 1, 2014 was not published separately in order to avoid disclosing any individual operation.

SHEEP LOSSES TO ALL CAUSES - 2014

TOTAL DEATH LOSS UP: Wyoming sheep and lamb producers lost an estimated 30,000 head of sheep and lambs to predators, weather, lambing problems, disease and other causes in 2014 according to our annual survey. Total losses were down 6,000 head from the previous year. Predators accounted for 42 percent of the losses. The 2014 lamb crop totaled 240,000 lambs marked, docked, or branded which was up 7 percent from 2013. Adding in the lambs lost before docking results in a potential lamb supply of 254,000 head. Of these, 8,700 or 62 percent were lost to various non-predator causes, compared to 57 percent in 2011.

PREDATOR LOSSES DOWN: Wyoming sheep producers lost 12,700 sheep and lambs to predators in 2014, down 27 percent from 2013. Coyotes were again the biggest predator taking 64 percent of the total predator losses and 27 percent of all losses. Losses to weather, disease and other non-predator causes decreased by 1,400 head to 17,300.

LAMB LOSSES DOWN: Sheep producers lost 23,000 lambs before or after docking in 2014, down 4,000 head from 2013. Losses to predators accounted for 48 percent of the total, down 3,400 head from 2013. Losses of lambs to weather, disease and other non-predator causes were down 600 head to 12,000.

SHEEP LOSSES DOWN: Sheep losses in Wyoming during 2014 totaled 7,000 head, down 2,000 head from 2013. Predator losses were down 1,200 head, at 1,700 and non-predator losses were down 800 head to 5,300.

VALUE OF LOSSES LOWER: Sheep producers lost an estimated \$4.9 million due to sheep and lamb deaths in 2014, down from \$5.7 million the previous year. Predation accounted for \$2.1 million, or 42 percent of the total.

Sheep Losses All Predator, Non-Predator Causes Wyoming

Wyoming Sheep & Lamb Losses 2014

Wyoming sheep and lamb producers lost an estimated 30,000 head of sheep and lambs to predators, weather, lambing problems, disease, and other causes in 2014 according to our annual survey. Total losses were down 6,000 head from the previous year. Predators accounted for 42 percent of the losses. The 2014 lamb crop totaled 240,000 lambs marked, docked, or branded which was up 7 percent from 2013. Adding in the lambs lost before docking results in a potential lamb supply of 254,000 head. Of these, 8,700, or 62 percent, were lost to various non-predator causes, compared to 57 percent in 2013.

These data are based on reports from producers on our annual January Sheep and Goat Survey. We thank all Wyoming ranchers and farmers for their help with this survey. We also thank the Wyoming Business Council, Agribusiness Division who funds this report as part of the annual agreement with our agency to provide statistics for Wyoming agriculture.

If you have any question about this report please call us toll-free at 1-800-892-1660.

HIGHLIGHTS

Wyoming sheep producers lost 12,700 sheep and lambs to predators in 2014, down 27 percent from 2013. Coyotes were again the biggest predator taking 64 percent of the total predator losses and 27 percent of all losses. Losses to weather, disease, and other non-predator causes decreased by 1,400 head to 17,300.

Sheep producers lost 23,000 lambs before or after docking in 2014, down 4,000 head from 2013. Losses to predators accounted for 48 percent of the total, down 3,400 head from 2013. Losses of lambs to weather, disease, and other non-predator causes were down 600 head to 12,000

Sheep losses in Wyoming during 2014 totaled 7,000 head, down 2,000 head from 2013. Predator losses were down 1,200 head at 1,700 and non-predator losses were down 800 head to 5,300.

Sheep producers lost an estimated \$4.9 million due to sheep and lamb deaths in 2014, down from \$5.7 million the previous year. Predation accounted for \$2.1 million or 42 percent of the total.

2014 CROP YEAR IN REVIEW

Wyoming started 2014 with below normal temperatures and snow water with equivalent levels above normal, and continued to increase throughout the month of January. January topsoil moisture supplies were 1 percent very short, 23 percent short, 73 percent adequate, and 3 percent surplus. Snow pack was reported as being in good condition in many locations in February, but warmer temperatures allowed producers to get a head start on seeding barley, with 20 percent of the acreage seeded, 5 percentage points ahead of 2013. The winter wheat crop was rated 2 percent poor, 22 percent fair, 72 percent good, and 4 percent excellent.

Below normal temperatures and scattered precipitation slowed small grain seedings in early April, but by the end of the month seedings of barley, oats, and spring wheat were comparable to the previous year, and corn and dry bean plantings were ahead of 2013. The winter wheat crop was rated 4 percent very poor, 5 percent poor, 43 percent fair, 47 percent good, and 1 percent excellent. The planting pace for all crops increased in May and were ahead of the five-year average as warmer temperatures allowed fieldwork. The irrigation water supply was rated 2 percent poor, 3 percent fair, and 95 percent good to excellent.

By mid-June, crop development progress was ahead of the five-year average, and alfalfa and other hay cuttings were ahead of the previous year and the average. Winter wheat conditions were improving and were rated 2 percent poor, 42 percent fair, 54 percent good, and 2 percent excellent. By early July, the first cutting of alfalfa was almost three-quarters finished, ahead of the average pace. Spring planted crops were in mostly good to excellent condition. Winter wheat harvest started later than normal in late-July/early-August and progressed behind the normal pace until completed in late-August.

Small grain crops continued to be harvested at a rapid pace in early September. Winter wheat plantings were progressing slightly ahead of normal. By mid-October, corn for grain and sugarbeet harvest were progressing near normal.

The sugarbeet harvest was nearly complete by mid-November, but corn for grain harvest was only 86 percent complete by the end of November. Winter wheat condition was rated 66 percent good to excellent going into dormancy. Topsoil moisture levels were rated 6 percent very short, 23 percent short, and 71 percent.

WINTER WHEAT production in 2014 increased 65 percent from 2013. Harvested acreage increased 5,000 acres from 2013 and the average yield per acre increased 14.0 bushels to 38.0 bushels per acre. The average yield in 2013 was 24.0 bushels per acre.

BARLEY production in 2014 was up 11 percent from last year. Harvested acreage was down 5,000 acres and yield averaged 107.0 bushels per acres, up 18.0 bushels from 2013.

OAT production in 2014 was 413,000 bushels, down 28 percent from 2013. Grain was harvested from 7,000 acres. Compared to last year, the average yield was up by 2.0 bushels per acre at 59.0 bushels per acre.

CORN FOR GRAIN production was down 3 percent and the harvested acreage decreased by 7,000 acres compared to last year. Yields averaged 138.0 bushels per acre, up 11.0 bushels from 2013.

CORN FOR SILAGE production was down 13 percent. Silage was harvested from 27,000 acres, down 4,000 acres from 2013. The average yield was 24.0 tons per acre, unchanged from 2013.

DRY BEAN production in 2014 decreased 18 percent from 2013. Acreage harvested was up 600 acres. The average yield, at 2,130 pounds per acre, was down 490 pounds from last year.

SUGARBEET production was down 5 percent from 2013. Acreage harvested increased 300 acres compared to last year. The average yield per acre was down 6 percent at 27.8 tons per acre.

ALFALFA HAY production in 2014 increased 7 percent from 2013 to 1.27 million tons. Acreage cut for alfalfa was up at 490,000 acres while average yields declined from 3.20 tons to 2.60 tons per acre. Production of **ALL OTHER HAY** was up 50 percent from 2013. Acreage cut was up 80,000 acres and the average yield increased to 1.70 tons per acre. **ALL HAY** production was up 7 percent from 2013 and up 16 percent from 2012.

ALFALFA SEED production in 2014 totaled 4.33 million pounds of seed from 8,448 acres according to the Wyoming Seed Certification Service. Production increased by 17 percent from the 2013 crop.

PRICES

The U.S. **Price Index for Agricultural Production** in 2014 fluctuated throughout the year. The index peaked at 115 (2011 Base=100) in April and May. The low for the year was 100 in January and October. The **Livestock Production Index** had more highs during the end of the year and hit 140 twice in October and November. The Livestock index remained fairly consistent throughout the year with a low of 114 in January. The **Crop Production Index** began the year with lower numbers, 91 in January and remained below 90 the last quarter, reaching a low of 81 in October.

Beef Cattle prices started 2014 slightly above last year's ending price of \$130.00, reaching a low of \$138.00 in January, and ended the year at \$164.00. The average price for the year was \$153.00 per cwt., up \$28.00 from 2013 and the highest on record.

Combined **Steer and Heifer** prices started out at \$140.00 per cwt. and ended the year at \$166.00, the highest on record.

Calf prices started out 2014 at \$208.00 per cwt. in January and ended the year at \$303.00. The monthly high for the year was \$307.00 in October. The average price for the year was \$264.00 per cwt., up significantly from previous years.

Wool prices averaged \$1.46 per pound in 2014, up 1 cent from 2013. The marketing year average was \$1.52 in 2012.

Hog prices averaged \$76.50 per cwt. in 2014, up \$9.30 from 2013. The marketing year average was \$67.20 in 2013 and \$64.20 in 2012.

Milk prices began 2014 at \$23.50 per cwt in January and ended the year up at \$20.40 per cwt. Compared to 2013, the marketing year average price was \$3.96 per cwt to \$24.07 per cwt.

The All Hay price for 2014 started the year at \$162 per ton, \$1 lower than the price in December. The all hay 2014 MYA is \$4 higher than the 2013 average of \$176.00 per ton but \$11 less than the 2012 MYA. The 2014 MYA price for **alfalfa**, at \$202 per ton, was up \$3.00 from the 2013 average. The MYA price for **other hay** was \$131 per ton, down \$8 from 2012 and down \$13 from 2012.

Wheat prices during the 2014 crop marketing year started out at \$6.49 per bushel and then declined to \$6.14 per bushel to end the year. The MYA price was \$5.99 per bushel in 2014, \$6.87 in 2013, and \$7.77 in 2012.

Corn prices were declining during the first part of the 2014 crop marketing year, and ended the year with a MYA price of \$3.65 per bushel, compared to \$4.46 per bushel for 2013 and \$6.89 per bushel in 2012.

Feed Barley prices trended downward in 2014 with the average at \$3.17 per bushel compared to the 2013 average of \$4.28, and also down from the 2012 average of \$5.62.

Oats MYA price for 2014 was \$3.21 per bushel, down 54 cents from 2013.

Dry Bean prices were lower in 2014, compared to 2013, with the average price ending up lower at \$34.50 per cwt in 2014. MYA in 2013 was \$39.10 and in 2012 \$38.00.

The 2014 **Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW)** for the U.S. came in at 111 percent of the 2011 average. The index is up 5 points from the 2013 average of 106 percent.

1/ Same day news releases are issued for most reports. Separate reports are also printed for Cattle Loss, Sheep Loss, Wheat Varieties, and Barley Varieties. The annual book, "Wyoming Agricultural Statistics", is a summary of all data for the previous year. All reports are available on the Internet at www.nass.usda.gov/wy

National Agricultural Statistics Service (NASS) Reports and Data

The NASS Internet homepage provides easy access to the wide range of reports, data and general information published throughout the year. All data in this bulletin is published at an earlier date and can be found most quickly via the Internet.

NASS Homepage – <http://www.nass.usda.gov>

Wyoming Homepage – http://www.nass.usda.gov/Statistics_by_State/Wyoming/index.asp

Through a cooperative agreement with Cornell University, the Albert R. Mann Library distributes NASS, Economic Research Service (ERS), and World Agricultural Outlook Board (WAOB) periodicals and data files via the USDA Economics and Statistics System on a web server. Over 500 NASS reports annually are available free of charge. All NASS reports along with WAOB's World Agricultural Supply and Demand Estimates (WASDE) are available electronically seconds after release.

A calendar of scheduled releases is available from the NASS Homepage by clicking on **Publications**. The next screen is the Reports Calendar where you can choose the year and month of interest.

Free E-Mail Subscriptions to NASS Reports

When a current report is released, it can be sent free of charge via e-mail to the list of subscribers for that report. From the NASS homepage, select **Publications**, then follow the instructions under **Receive Reports by Email**. The four report options available in Wyoming are:

- Wyoming All Reports
- Wyoming Crop-Weather
- Wyoming Crops and Livestock
- Wyoming Miscellaneous

There is no charge for e-mail subscriptions via Internet. You will receive a confirmation message to your email address you provide. You must verify that you subscribed to the releases before you start receiving the releases in your inbox. You may unsubscribe at any time by going to the **Subscription Page** and unchecking the reports you wish to discontinue.

Agricultural Statistics Data Base (Quick Stats)

Published **U.S., State, and County** information is also available in an online database **FREE OF CHARGE**. The database allows custom extracts based on commodity, year, State, and other selection criteria and produces an output file compatible for updating databases and spreadsheets for selected commodities. The database can be accessed from the NASS homepage then selecting **Data and Statistics**. From there you can retrieve National, State, or County level data. The Census of Agriculture is also available in Quick Stats. The database allows custom extracts based on commodity, year, selected counties within a State, or all counties in one or more States. The county data include totals for the Agricultural Statistics Districts (county groupings) and the State. Video tutorials and other information can be found by selecting **Help**.
