Dear Reader,

The Wyoming Business Council Agribusiness Division is pleased to continue our partnership with Wyoming NASS to bring you this edition of *Wyoming Agricultural Statistics*. We appreciate the hard work that goes in to this publication and realize that this year has been a testament to the upper hand that Mother Nature has on agriculture.

The primary function of the Agribusiness Division is to assist farmers, ranchers and agribusinesses in developing and expanding domestic and international marketing opportunities; enhancing business development skills; and advancing leadership skills and personal development. Specific Wyoming Business Council Agribusiness Division programs include:

- **Ag Business Development Program** helps increase financial sustainability of agribusinesses and recruits new agribusiness companies to Wyoming, and connects ag producers to consumers and businesses.
- **Beginning Producer Assistance** helps link veteran farmers and ranchers with those wanting to get a start in production agriculture.
- **Crop and Forage Promotion Program** assists crop producers identify alternative crops and marketing opportunities and promotes Wyoming's premium quality hay.
- **Farmers Market Program** promotes community farmers markets and provides assistance to new and existing market managers and agriculture producers.
- **Food Export Program** enhances marketing opportunities for Wyoming ag producers and food processors in the national and international marketplace.
- **Income Diversification Program** provides consulting to ag producers interested in diversifying their income to sustain their farming and ranching operations.
- **Livestock Genetics Program** assists seedstock producers promote their livestock in the domestic and international marketplace through consultation and one-on-one market plan development.
- **Livestock and Meat Marketing Program** assists producers in capturing additional value from their livestock and includes a source and age and natural verification program for livestock. A new program promotes commercial bred heifers and replacement heifers.
- **Wyoming L.E.A.D. Program** develops leadership skills and expands knowledge base for ag producers and agribusiness professionals interested in shaping Wyoming agriculture and rural communities.

The Agribusiness Division sponsors various educational programs, workshops and trade events for Wyoming ag producers. In addition, the Division publishes a quarterly *AGtivities* newsletter and has an on-line agribusiness directory.

To learn more about Wyoming Business Council programs, go to our website at www.wybusiness.org or find us on Facebook at www.facebook.com/wyomingagriculture.

If our division can assist you in "Growing Wyoming Agriculture," please feel free to contact me.

With warm regards,

Cindy Garretson-Weibel, Agribusiness Director
Wyoming Business Council

"Growing Wyoming Agriculture"

United States Department of Agriculture
National Agricultural Statistics Service
Wyoming Field Office

Dear Data User,

Once again it is a pleasure to present to you the “2012 Wyoming Agricultural Statistics”. This publication contains current and historical statistics at both the State and county level. The free distribution of this publication would not be possible without the funding of the Wyoming Business Council, Agribusiness Division under the direction of Cindy Garretson-Weibel. Dr. Bret Hess with the University of Wyoming, Agricultural Experiment Station also helps fund the printing costs. If you enjoy this publication, please let these great sponsors know.

Agriculture in Wyoming during 2011 was a year of records. Cash receipts for all agriculture products were up \$252 million from 2010 with a \$162 million increase in livestock and products while there was a \$90 million increase in crops. Wyoming saw record snowpack which resulted in record flooding as summer approached. Hay prices soared to record levels as the drought in southern states continued. Wyoming hay stocks ended the year at the lowest levels since 2002. The cooler spring, mild summer, and mild fall favored sugarbeets and hay as record yields were achieved for these crops. With the available moisture, the potential for most crops was very good; however, summer hail storms damaged winter wheat in the southeast. Because of cooler early temperatures, most crops progressed behind normal but as July and August rolled around crop progress caught up. A nice fall allowed producers ample time to harvest crops.

Cattle and sheep prices also saw records in 2011. With adequate moisture, pasture conditions were above normal and stock ponds were in good shape. However, weather was not that nice to livestock producers. Weather killed 26,800 head of sheep and lambs, an increase of 14,200 head from 2010 with losses valued at \$3.2 million. Weather-related deaths for cattle and calves also increased from 2010 with losses valued at \$7.3 million for 2011.

I want to thank the many Wyoming producers who continually volunteer to provide the data we collect on our surveys. This information makes it possible to tell the story of Wyoming agriculture every year.

As always, special thanks goes out to the dedicated employees of our Farm Service Agency offices, Natural Resource Conservation Service offices, and our County Extension offices that help provide valuable input to our programs. The office staff of our Wyoming Field Office again did an excellent job in compiling the statistics included herein. Last, but certainly not least, we owe many thanks to our “backbone data collectors”, our field and office enumerators, for their perseverance and skill in collecting survey data throughout the year.

Customer service is very important to us. Don’t hesitate to give us a call if we can help provide you with any information. You can also visit our web site at:
http://www.nass.usda.gov/Statistics_by_State/Wyoming/ to view this publication and all of our other reports.

Sincerely,

Todd Ballard
Director

WYOMING AGRICULTURE 2011

The value of the agricultural sector output in Wyoming annually approaches or exceeds \$1 billion. Cash receipts have exceeded that threshold in 7 of the last 9 years. In 2011, 11,000 farms and ranches were operating in Wyoming with a total land area of 30.2 million acres. Wyoming ranks 11th nationally in total land in farms and ranches and 1st in average size of farms and ranches. The cattle industry is by far the largest component of Wyoming agriculture accounting for 59.7 percent of all cash receipts in 2011. Cattle also led the way in 2011 in terms of value of production at \$603.6 million. All livestock production was valued at \$804.8 million, up 28 percent from 2010. Sheep and hogs were far behind cattle with value of production at \$49.1 million and \$118.4 million, respectively.

Hay is the leading crop in Wyoming in terms of value of production totaling \$306.8 million in 2011, but most is fed to livestock. **Sugarbeets** had the next highest crop value in 2011 with an estimated \$59.6 million (based on 2011 production and 2010 prices, final 2011 prices pending), followed by **corn** at \$54.6 million, **barley** at \$30.6 million, **dry beans** at \$30.3 million, and **wheat** at \$28.7 million. In terms of cash receipts, hay and sugarbeets were the leading crops followed by corn.

Cattle and calves inventory on January 1, 2012 totaled 1.36 million head with an inventory value of \$1.81 billion. Cattle inventory was up 5 percent from January 1, 2011. The January 1, 2012 inventory of **sheep and lambs** was 370,000 head, valued at \$88.3 million. The January 1, 2012 breeding sheep inventory was down 5,000 head while the market sheep and lamb inventory was up 10,000 head from the previous year. **Hogs and pigs** increased 3 percent to 102,000 head on December 1, 2011. The breeding hog inventory increased 18 percent, while the market hog inventory was down 2,000 head from last year. The December 1, 2011 hog and pig inventory value was \$14.3 million.

	Wyoming			Eleven States Animal Unit 3/	Sixteen States Animal Unit 4/
	Animal Unit 2/	Cow-Calf	Per Head		
Dollars per month					
2002	13.50	15.60	14.00	12.50	13.50
2003	13.40	15.50	13.90	12.80	13.80
2004	13.90	16.00	14.30	13.30	14.30
2005	14.80	17.00	15.50	13.70	14.60
2006	15.10	17.30	15.80	13.90	15.20
2007	15.40	17.90	16.10	14.90	15.90
2008	15.70	18.40	16.40	15.00	16.20
2009	16.00	18.70	16.70	14.70	16.10
2010	16.60	19.30	17.20	15.00	16.70
2011	17.60	20.50	18.30	16.00	17.90

1/The average rates are estimates based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Cattle Survey.

2/Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aum = cow-calf x 0.833).

3/Eleven states: AZ, CA, CO, ID, MT, NV, NM, OR, UT, WA, and WY.

4/Sixteen states: Previous eleven plus KS, NE, ND, OK, and SD.

1/Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/A positive value of inventory change represents current year production not sold by December 31. A negative value is an offset to production from prior years included in current year sales.

1/Value of sales.

2/The 2011 value of sugarbeet production is based on 2010 price and 2011 production. The 2011 price is not available until January 2013.

LAND USE AND AGRICULTURAL VALUE IN WYOMING COUNTIES

The following estimates of the county value of livestock inventories are based on State average inventory values multiplied by county livestock inventory estimates. The reference date for cattle and sheep is January 1, 2012 and for hogs is December 1, 2011. The value of livestock also includes 2011 wool and milk production apportioned to counties based on the number of sheep and milk cows. For crops, the 2011 county production estimates are multiplied by preliminary marketing year average prices for the State. The previous year price is used for sugarbeets. Crops include alfalfa and other hay, winter wheat, barley, oats, corn grain and silage, dry beans, and sugarbeets.

LIVESTOCK

The number of **cattle and calves** on Wyoming farms and ranches on January 1, 2012, was 1,360,000 head, 5 percent above last year. The inventory of beef cows increased to 714,000 head. Beef cow heifers kept for replacement increased 18 percent to 165,000 head. The remaining total beef cattle inventory, accounted for by other heifers, steers, bulls and all calves (under 500 pounds), also increased by 3 percent from the previous year. The 2011 calf crop, at 680,000 calves, was up 3 percent compared to 2010. The 2011 U.S. market year average price per cwt. received for steers & heifers was \$117.00, up 20 percent from 2010. The 2011 market year average price of calves was up by 21 percent for the U.S.

The number of **milk cows** in Wyoming herds during 2011 averaged 6,000 head, unchanged from a year ago. Total milk production has increased by 2 percent to 123 million pounds. Average production per cow also increased 2 percent to 20,517 pounds. The U.S. average price per cwt. received for milk increased by \$3.10 to \$19.60 in 2011.

The number of **hogs and pigs** in Wyoming on December 1, 2011 was 102,000 head, up 3,000 head from a year earlier. Breeding inventory increased to 33,000 head. Market hogs and pigs decreased 2,000 head to 69,000 head. The 2011 pig crop totaled 778,000 pigs, up 15 percent from 2010. The 2011 U.S. market year average price per cwt. for all hogs was \$65.30, up \$11.20 per cwt. from the previous year.

Sheep and lamb inventory in Wyoming on January 1, 2012 totaled 370,000 head, up 5,000 head from the previous year. Total breeding stock inventory was down 5,000 head from the previous year to 270,000. The 2011 lamb crop totaled 220,000 lambs, down 10,000 head from 2010. One hundred lambs were saved per every 100 ewes in 2011, up 4 from a year earlier. The market year average price received, for sheep and lambs in 2011 was \$239, \$68 above the previous year's price and \$18 over the US average.

Sheep and lamb losses to all causes during 2011 totaled 55,000 head. Losses to predators, as a percent of the total, were down 9 percent from the previous year. Coyotes again claimed the largest portion of predator loss, accounting for 62 percent of the 17,500 head lost to predators. Non-predator losses totaled 37,500 head for the year, with weather accounting for the largest portion of non-predator loss. Total predator losses were valued at \$2.1 million with losses from all causes valued at \$6.7 million.

Wyoming sheep and lambs produced 2,450 million pounds of wool in 2011, down 6 percent from 2010. However, the 2011 weight per fleece was only down 2 percent at 8.9 lbs. The wool price per pound averaged \$2.57, up from \$1.73 in 2010.

The number of **chickens** in Wyoming flocks on December 1, 2011 is no longer published separately in order to avoid disclosing individual operations. An average of 11,000 layers produced 2.4 million eggs in a 12-month period ending December 1, 2011, unchanged from the previous year.

1/Adjustments made for changes in inventory and for inshipments.

2/Excludes custom slaughter for use on farms where produced and sales between farms within Wyoming.

3/Price estimates discontinued for cattle and calves.

4/Receipts from marketings and sale of farm slaughter.

CATTLE LOSSES TO ALL CAUSES - 2011

Wyoming cattle producers lost an estimated 43,000 head of cattle and calves to many causes in 2011, the largest causes being weather, calving, respiratory/digestion problems and predators. The data for these estimates is collected in conjunction with our annual January Cattle Survey. Total losses were up 2,000 head from 2010, mainly due to the hands of Old Man Winter. Death loss as a percentage of Wyoming's total cattle and calves inventory was 3 percent, unchanged from 2010. Predators accounted for 9 percent of combined cattle and calf loss, while weather was the biggest contributor to loss at 27 percent. The total value of all losses to all causes was estimated at \$29.0 million.

1/Cattle value is based on the average value per head of beef cows from our annual January 1 Cattle Survey. The average value used for 2009 was \$966, 2010 was \$1,094, and 2011 was \$1,312. Calf value per head is based on market year average calf price per cwt and converted to a per head price using 300 pounds. The average calf value used for 2009 was \$330, 2010 was \$351; and 2011 was \$426.

2/Included in Other Predators and Other Causes.

3/No value calculated due to losses less than 50 head.

SHEEP LOSSES TO ALL CAUSES - 2011

TOTAL DEATH LOSS UP: Wyoming sheep and lamb producers lost an estimated 55,000 head of sheep and lambs to predators, weather, lambing problems, disease and other causes in 2011 according to our annual survey. Total losses were up 14,000 head from the previous year. Predators accounted for 32 percent of the losses. The 2011 lamb crop totaled 220,000 lambs marked, docked, or branded which was down 4 percent from 2010. Adding in the lambs lost before docking results in a potential lamb supply of 251,000 head. Of these, 23,800 or 77 percent were lost to various non-predator causes, compared to 65 percent in 2010.

PREDATOR LOSSES UP: Wyoming sheep producers lost 17,500 sheep and lambs to predators in 2011, up 4 percent from 2010. Coyotes were again the biggest predator taking 62 percent of the total predator losses and 20 percent of all losses. Losses to weather, disease and other non-predator causes increased by 13,300 head to 37,500.

NON-PREDATOR LAMB LOSSES UP: Sheep producers lost 44,000 lambs before or after docking in 2011, up 12,000 head from 2010. Losses to predators accounted for 35 percent of the total, up 900 from 2010. Losses of lambs to weather, disease, and other non-predator causes were up 11,100 head to 28,600.

SHEEP LOSSES UP: Sheep losses in Wyoming during 2011 totaled 11,000 head, up 2,000 head from 2010. Predator losses were down 200 head at 2,100 and non-predator losses were up 2,200 head to 8,900.

VALUE OF LOSSES HIGHER: Sheep producers lost an estimated \$6.7 million due to sheep and lamb deaths in 2011, up from \$3.5 million the previous year. Predation accounted for \$2.1 million or 31 percent of the total.

2011 CROP YEAR IN REVIEW

January through March produced little snow although moisture supplies remained above both last year and the average. Snow pack was above average. The winter wheat crop was in mostly good condition with only light wind freeze damage. Producers started planting barley in late March slightly behind average pace.

A cool, wet spring allowed producers to seed small grains early but held crop development behind normal. Winter wheat condition held steady. Adequate reservoir levels promised necessary irrigation water supplies for the growing season. Seeding of row crops got off to a slow start in May, and cooler temperatures through June held all crop progress behind normal. Hay harvest started behind average pace.

All crops remained in fair to mostly good condition throughout the remainder of the growing season. Summer brought mostly hot, dry weather and pushed crop development. Harvest of winter wheat started in mid July and moved at an average pace through the end of August. Harvest was comparable to last year and the average for the remaining small grains. Hay harvest stayed on schedule with many producers getting a third cutting of alfalfa. Weather conditions were favorable for row crop development. Corn silage harvest began in early September.

Fall brought favorable harvest conditions. Sugarbeet producers finished digging beets in early November slightly ahead of normal. Dry bean combining finished in late October. Corn for grain harvest ended the first week in December behind last year but ahead of average pace. Producers continued to harvest alfalfa through mid-November. Corn silage harvest was at normal pace.

Average yields per acre in 2011 fell for oats and barley, but increased for winter wheat. Row crop yields during 2011 increased for corn for grain, sugarbeets, and dry beans. Alfalfa and other hay yields were mixed compared to 2010.

WINTER WHEAT production in 2011 decreased 5 percent from 2010. Harvested acreage was down 15,000 acres but the average yield per acre increased 2.0 bushels to 34.0 bushels per acre.

BARLEY production in 2011 was up 1 percent from last year. Harvested acreage was up 1,000 acres and yields averaged 97.0 bushels per acre. The average yield in 2010 was 98.0 bushels per acre.

OAT production in 2011 was 572,000 bushels, up 4 percent from 2010. Grain was harvested from 11,000 acres. Compared to last year, the average yield was down by 9.0 bushels per acre at 52.0 bushels per acre.

CORN FOR GRAIN production was up 50 percent. Harvested acreage increased 20,000 acres from last year. Yields averaged 130.0 bushels per acre, up 9.0 bushels from 2010.

CORN FOR SILAGE production was down 17 percent. Silage was harvested from 25,000 acres, down 5,000 acres from 2010. Average yield was 22.0 tons per acre, unchanged from 2010.

DRY BEAN production in 2011 decreased 29 percent from 2010. Acreage harvested was down 14,000 acres. Average yield, at 2,200 pounds per acre, was up 20 pounds from last year.

SUGARBEET production was up 5 percent from 2010. Acreage harvested increased 500 acres compared to last year. The average yield per acre was up 3 percent at 27.8 tons per acre.

ALFALFA HAY production in 2011 decreased 4 percent from 2010 to 1.55 million tons. Acreage cut for alfalfa was steady at 620,000 acres while average yields fell slightly from 2.60 tons to 2.50 tons per acre. Production of all **OTHER HAY** was down 6 percent from 2010. Acreage cut was down 70,000 acres but the average yield increased slightly to 1.60 tons per acre. **ALL HAY** production was down 5 percent from 2010 and down 7 percent from 2009.

ALFALFA SEED production in 2011 totaled 4,242 million pounds from 8,046 acres according to the Wyoming Seed Certification Service. Production declined by 1 percent from the 2010 crop.

PRICES

The U.S. **All Commodities Price Index** in 2011 fluctuated throughout the year. The index peaked at 184 (1990-92=100) in October and November. The low for the year was 166 in January. The **All Livestock Index**, which drives the **All Commodities Index** in Wyoming, came in above the previous year. The Index hit a high of 158 in August and a low of 137 in January. The **All Crops Index** came in higher during most of 2011 compared to last year. The index started at 189 in January, peaked at 210 in August and finished with 191 in December.

Beef cattle prices started 2011 at \$107.00, fluctuated in the summer, and ended the year at \$120.00. The average price for the year was \$113.00 per cwt. up \$20.80 from 2010 and up \$29.80 from 2009. Monthly prices peaked at \$120.00 in December.

Combined **steer and heifer** prices started out at \$110.00 per cwt. and worked its way up to a peak of \$126.00 in December. The average price for the year was \$117.00 per cwt. up \$19.30 from 2010 and up \$14.00 from 2009.

Calf prices started out the year at \$136.00 per cwt. it dropped to 132.00 in September. The monthly high for the year was \$157.00. The average price for the year was \$142.00 per cwt. up \$25.00 from 2010.

Wool prices averaged \$2.57 per pound in 2011, up 84 cents from last year. The marketing year average was \$1.73 in 2010, \$1.16 in 2009, and \$1.46 in 2008.

Hog prices averaged \$65.30 per cwt. in 2011, up \$11.20 from last year. The marketing year average was \$54.10 in 2010 and \$38.30 in 2009.

Milk prices finished stronger compared to 2010. The marketing year average price for 2011 was \$19.60 per cwt. up \$3.10 from 2010. Prices hit a low of \$16.60 per cwt. in January and a high of \$21.20 in September.

The all hay price for the 2011 crop was above the \$100 mark the entire year. All hay started the marketing year in June 2011 at \$105.00 per ton and ended the marketing year at \$157.00 per ton in May 2012. The preliminary marketing year average price for **alfalfa**, at \$136.00 per ton, was up \$43.00 from 2010. The preliminary marketing year average price for **other hay** was \$120.00 per ton, up \$35.00 from 2010.

Wheat prices during the 2011 crop marketing year started out strong but fell off during the remainder of the year. The preliminary marketing year average price was \$6.50 per bushel, up 87 cents from 2010.

Corn prices started out weaker during the first part of the 2011 crop marketing year but continued to strengthen. The preliminary marketing year average price was \$6.00 per bushel, up 69 cents from 2010.

Feed barley preliminary market year average price for the U.S. was \$4.91 per bushel, up 1.69 cents from 2010.

Oats preliminary market year average price for 2011 was \$3.30 per bushel, up 60 cents from 2010.

Dry bean prices fluctuated in 2011 but looked more promising towards the end of the marketing year. The preliminary marketing year average price was \$41.80 per cwt. up \$11.50 from 2010.

The 2011 **Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW)** for the U.S. came in at 203 percent of the 1990-1992 average compared to 183 percent in 2010. Prices paid by farmers and ranchers in the Mountain region on March 15, 2012 were higher for all items.

College of Agriculture and Natural Resources 2012

Agricultural research has been critical to shaping our daily lives. The University of Wyoming (UW) College of Agriculture and Natural Resources strives to continue this effort by working to improve the profitability of our farms and ranches, ensure that Wyoming agriculture delivers quality products to meet the growing food and renewable energy challenges, protect our environment, and ensure our communities are better prepared to cope with challenges they face.

With nine undergraduate and 20 graduate degree programs, the college's array of educational opportunities is impressive and designed to give students the ability to find solutions for the complex range of interactions facing agriculture today. These degree programs provide students with a broad educational background, which allows them to focus training in their areas of interest. Students graduating from UW with a degree in agriculture or applied science have excellent opportunities for employment in a number of areas. Active participation in research projects and internships with business and government agencies offer students first-hand work experience before graduating. For additional information about the college's academic programs contact the Office of Academic and Student Programs (307-766-4135, ag-college@uwyo.edu) or any of our nine departmental units:

Agricultural & Applied Economics 307-766-2386 ag_econ@uwyo.edu

Agricultural Communications 307-766-4135 agcomm@uwyo.edu

Animal Science 307-766-2224 animalscience@uwyo.edu

Bachelors of Applied Science 307-766-4034 mandie@uwyo.edu

Ecosystems Science & Management 307-766-2263 renewableresources@uwyo.edu

Family and Consumer Sciences 307-766-4145 fcs-consci@uwyo.edu

Molecular Biology 307-766-3300 molecularbiology@uwyo.edu

Microbiology 307-766-3139 microbiology@uwyo.edu

Plant Sciences 307-766-3103 plantsciences@uwyo.edu

Veterinary Sciences 307-766-9926 vetscience@uwyo.edu

Research, educational, and outreach programs in the College of Agriculture and Natural Resources extend beyond the UW campus. Research projects are conducted at the college's four major research and extension centers located at Powell, Sheridan, Lingle, and Laramie, or with individual cooperators located throughout the state. With personnel in every county and with research and extension centers located around the state, the College of Agriculture and Natural Resources is working to provide research and outreach outcomes that are responsive to the needs of stakeholders. The College of Agriculture and Natural Resources provide educational, research, and outreach support of natural resource management, safe and wholesome foods, sustainable agricultural systems, rural economic and community development, as well as basic and applied life sciences. The Bachelor of Applied Science (BAS) degree housed in the college is designed for individuals with a minimum of two years work experience who have completed an Associate of Applied Science degree at a Wyoming community college and who need or desire the additional breadth in skills, knowledge, and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work. All courses required to fulfill UW's requirements can be taken on line.

The College of Agriculture and Natural Resources is proud to have tripartite mission of instruction, research, and extension because it allows us to meet and serve our stakeholders' needs. Feel free to visit our campus, extension offices, or the research and extension centers to witness faculty, staff, and students in action or visit our website at www.uwyo.edu/UWAG to learn more about the college and its programs.

REPORTS ISSUED DURING THE YEAR 1/ WYOMING FIELD OFFICE, USDA NASS

	<u>Frequency</u>	<u>Approximate Date of Publication</u>
General Reports:		
Crop Weather	Weekly	April-October (Mondays)
"Range Review" - Summary of latest results	Monthly	1st
"Wyoming Agricultural Statistics" - Annual summary	Annual	August

Report Dates for Crops:

Winter Wheat Seedings	Annual	January (9th-12th)
Prospective Plantings	Annual	March (28th-31st)
Acreage Planted	Annual	June (28th-30th)
Crop Production Forecasts	Monthly	May-November (9th-12th)
Dry Edible Bean Acreage by Class	Annual	August (9th-12th)
Dry Edible Bean Production by Class	Annual	December (9th-12th)
Crop Production Annual	Annual	January (9th-12th)
Crop Values	Annual	February (12th-16th)
Wheat Varieties	Annual	March
Barley Varieties	Annual	July
Hay Stocks	Semi-Annual	January, May (9th-12th)

Report Dates for Livestock, Dairy, Poultry, and Livestock Products:

Cattle Inventory and Calf Crop	Semi-Annual	January or February (5th Friday of year), and July (3rd Friday)
Cattle Loss	Annual	March
Sheep Inventory and Lamb Crop	Annual	January or February (5th Friday of year),
Sheep Shorn and Wool Production	Annual	January or February (5th Friday of year)
Sheep and Lamb Loss	Annual	February (3rd Friday)
Hog Inventory and Pig Crop	Annual	December (last Friday of year)
Livestock Slaughter	Monthly	20th-26th
Meat Animals - Production, Disposition, and Income	Annual	April (26th-28th)
Milk Cows and Milk Production	Quarterly	January, April, July, October (17th-19th)
Bee Colonies and Honey Production	Annual	March (26th-30th)

County Estimates:

Wheat and Barley	Annual	February
Corn	Annual	March
Hay - All, Alfalfa, and Other	Annual	April
Sugarbeets and Dry Beans	Annual	June
Livestock - Cattle and Breeding Sheep	Annual	April
All Crops, Cattle, and Sheep	Annual	In "Wyoming Agricultural Statistics"

Prices and Miscellaneous:

Farm Labor	Quarterly	May and November (15th-21st)
Agricultural Prices	Monthly	(28th-31st)
Number of Farms and Land in Farms	Annual	February (10th-18th)
Farm Production Expenditures	Annual	August
Agricultural Land Values	Annual	August

¹/Same day news releases are issued for most reports. Summaries of these reports will appear in the next issue of the "Range Review". Separate reports are also printed for Cattle Loss, Sheep Loss, Wheat Varieties, and Barley Varieties. The annual book, "Wyoming Agricultural Statistics", is a summary of all data for the previous year. All reports are available on the Internet at www.nass.usda.gov/wy

Electronic Dissemination of Data from National Agricultural Statistics Service (NASS)

NASS has a homepage on the World Wide Web that provides easy access to the wide range of information and data produced. Through the homepage, you can obtain copies of all reports produced by NASS plus have access to many other options.

NASS Homepage – <http://www.nass.usda.gov>

Wyoming Homepage – http://www.nass.usda.gov/Statistics_by_State/Wyoming/index.asp

Through a cooperative agreement with Cornell University, the Albert R. Mann Library distributes NASS, Economic Research Service (ERS), and World Agricultural Outlook Board (WAOB) periodicals and data files via the USDA Economics and Statistics System on a web server. Over 400 reports annually are available free of charge. All NASS reports and WAOB's World Agricultural Supply and Demand Estimates (WASDE) are available electronically within minutes of release.

A calendar of scheduled releases is available from the NASS Homepage by clicking on **Publications**. At the next screen is the Reports Calendar where you can choose the year and month.

Free E-Mail Subscriptions to NASS Reports

The Mann Library provides a **FREE** e-mail service for NASS reports. When a current report is released, it is sent via e-mail to the list of subscribers for that report. From the NASS homepage at <http://www.nass.usda.gov>, select **Publications**. From the **Publications** page, on the right side is a box titled "Receive NASS Updates." Clicking on the "Receive reports by E-Mail" for either National or State reports will direct you through the process. The four report options available in Wyoming are:

Wyoming All Reports
Wyoming Crop-Weather
Wyoming Crops and Livestock
Wyoming Miscellaneous

There is no charge for e-mail subscriptions via Internet. You will receive a confirmation message to your email address you provide, you must verify that you subscribed to the releases before you start receiving the releases in your inbox. You may unsubscribe at any time by going to the **Subscription Page** and unchecking the reports you wish to discontinue.

Agricultural Statistics Data Base (Quick Stats)

U.S. and **State** information, published in NASS national reports, is available in an online database via the Internet **FREE OF CHARGE**. The database allows custom extracts based on commodity, year, State and other selection criteria and produces an output file compatible for updating databases and spreadsheets for selected commodities. The database can be accessed from the NASS homepage at: <http://www.nass.usda.gov>. The basic options are in the middle of the screen on the Home Page. Clicking on the "more" button will take you to the main menu for Quick Stats. From there you can retrieve State or County level data. The 2007 Census of Agriculture is also available.

County level data are also available via Quick Stats. The data include the total crops for each county and breakouts for irrigated and non-irrigated practices for many crops, for selected States. The database allows custom extracts based on commodity, year, selected counties within a State, or all counties in one or more States. The county data include totals for the Agricultural Statistics Districts (county groupings) and the State. The download data files contain planted and harvested area, yield per acre, and production. Livestock county data is also available for selected States.
