Released: Monday, June 7, 2010

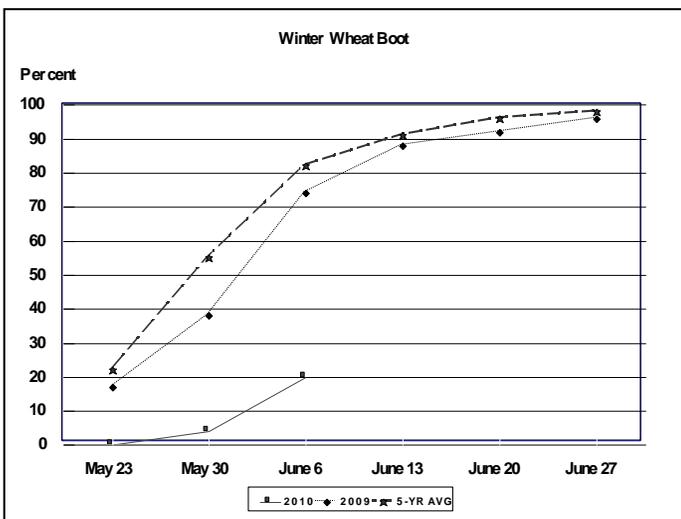

Week of May 31 – June 6, 2010

AGRICULTURAL SUMMARY: Conditions vary across the state.

Lincoln County was on target when they commented that it has been a strange spring so far. Big Horn County reported rain all week and good looking crops, Albany County reported dry and relentless wind which depleted topsoil moisture. Carbon County reported flooding with peak run off expected this week and Uinta County reported code red alert warnings of high runoff in the Blacks Fork drainage area with both dams opening gates and expected to spill by this Tuesday. Livestock look good and several counties reported greening up nicely. High temps ranged from the low 60s to low 80s. Lows ranged from the upper 20s to upper 40s. Six days were suitable for field work. Topsoil moisture was 90 percent adequate or better, down slightly from last week but up from last year and the 5-year average.

Topsoil	This Week	Last Week	Last Year	5-Yr Avg
Very Short	0	0	4	4
Short	10	7	11	22
Adequate	86	85	77	69
Surplus	4	8	8	5

FIELD CROP REPORT: Winter wheat condition was reported at 89 percent good or better, up from last week and the 5-year average, but down from last year at this time. Winter wheat progress is lagging behind in the boot stage but closely on schedule with last year and the average for jointing. Spring wheat is also lagging when it comes to the boot stage, but well ahead for jointing. Barley and oats are both behind average in jointing, but ahead of last year. Dry beans, corn and sugarbeet emergence are all behind compared to the 5-year average, as is the first cutting of alfalfa. Barley, oat and spring wheat conditions were all at least 60 percent good or better, with alfalfa and other hay conditions being at least 80 percent good or better. Irrigation water supplies are positive at 98 percent adequate or better, equal to this time last year and above the 5-year average.

CROP CONDITION TABLE

Item	Very Poor	Poor	Fair	Good	Excel
Barley	0	0	40	58	2

Corn Planted	94	89	97	97
Corn Emerged	67	39	64	75
Alfalfa 1st Cutting	3	0	6	7

LIVESTOCK, PASTURE, AND RANGE REPORT: Calf and lamb losses, for the majority remain positive, with only 1 percent reported heavy for either species. Range flocks are 81 percent lambled and 96 percent shorn. Cattle, calf, sheep and lamb conditions were all at least 90 percent good or better with 74 percent of cattle and 56 percent of sheep moved to summer pastures. Range and pasture conditions remain productive with 80 percent reported as good or better, improving 7 points from last week and remaining well above the 5-year average.

LIVESTOCK PROGRESS TABLE

	This Week	Last Week	Last Year	5-Yr Avg
Range Flock Ewes Lambled	81	72	81	84

WEATHER SUMMARY: Temperatures during the week averaged above normal at 23 of the 33 reporting stations. Average air temperature for the week ranged from 3 degrees below normal at Buffalo-Johnson to 11 degrees above normal at Buford. The high temperature for the state was 84 degrees at Torrington. The low was 26 degrees at Big Piney and Shirley Basin. Twenty-eight reporting stations received below normal precipitation for the week; however, only 12 stations averaged below normal this week for cumulative precipitation since January 1. The most precipitation for the week was 1.0 inches received in Thayne. This was 0.58 inches above normal for the week and raised their total accumulation since January 1 to 0.65 inches above normal.
