CROP PRODUCTION – MAY 2019

WYOMING HIGHLIGHTS

Hay stocks on Wyoming farms and ranches as of May 1, 2019 totaled 310,000 tons, down 3 percent from stocks of 320,000 tons on hand last year, according to the May 1 Agricultural Yield Survey conducted by the Mountain Regional Field Office of the National Agricultural Statistics Service, USDA. Hay production for 2018 was 2.39 million tons, 5 percent lower than 2017 production. Disappearance from December 1, 2018 to May 1, 2019 was 1.14 million tons, compared with 1.23 million tons the same period a year earlier.

UNITED STATES HIGHLIGHTS

Winter wheat production is forecast at 1.27 billion bushels, up 7 percent from 2018. As of May 1, the United States yield is forecast at 50.3 bushels per acre, up 2.4 bushels from last year's average yield of 47.9 bushels per acre.

Hard Red Winter production, at 780 million bushels, is up 18 percent from a year ago. Soft Red Winter, at 265 million bushels, is down 7 percent from 2018. White Winter, at 224 million bushels, is down 5 percent from last year. Of the White Winter production, 22.3 million bushels are Hard White and 201 million bushels are Soft White.

All hay stored on United States farms, as of May 1, 2019, totaled 14.9 million tons, down 3 percent from a year ago. Disappearance from December 1, 2018 - May 1, 2019 totaled 64.1 million tons, compared with 69.1 million tons for the same period a year earlier. This marks the lowest May 1 hay stocks since the drought of 2012 and the second lowest since records began in 1950.
