PROSPECTIVE PLANTINGS – MARCH 1, 2021

WYOMING HIGHLIGHTS

As of March 1, Wyoming growers intend to plant 90,000 acres of corn for all purposes in 2021, down 5,000 acres, or 5 percent from last year's plantings, according to the March 1 Agricultural Survey conducted by the Mountain Regional Field Office of the National Agricultural Statistics Service, USDA. Growers intend to plant 79,000 acres of barley in 2021, up 5,000 acres from last year’s actual plantings.

Winter wheat seeded last fall for harvest in 2021 is estimated at 120,000 acres, unchanged from the 2020 crop. Hay producers in the state intend to harvest 1.20 million acres this year. This is up 120,000 acres from the acreage cut for hay in 2020. The area planted to sugarbeets is expected to be down 3,000 acres from last year’s actual plantings to 28,000 acres. Dry edible bean acreage is expected to total 23,000 acres, down 21 percent from the 29,000 acres planted in 2020.

UNITED STATES HIGHLIGHTS

Corn planted area for all purposes in 2021 is estimated at 91.1 million acres, up less than 1 percent or an increase of 325,000 acres from last year. Compared with last year, planted acreage is expected to be up or unchanged in 24 of the 48 estimating States.

Producers intend to seed 2.59 million acres of barley for the 2021 crop year, down 1 percent from the previous year. If realized, this will represent the fourth lowest planted acreage on record.

All wheat planted area for 2021 is estimated at 46.4 million acres, up 5 percent from 2020. This represents the fourth lowest all wheat planted area since records began in 1919. The 2021 winter wheat planted area, at 33.1 million acres, is up 9 percent from last year and up 3 percent from the previous estimate. Of this total, about 23.2 million acres are Hard Red Winter, 6.42 million acres are Soft Red Winter, and 3.48 million acres are White Winter. Area expected to be planted to other spring wheat for 2021 is estimated at 11.7 million acres, down 4 percent from 2020. Of this total, about 10.9 million acres are Hard Red Spring wheat. Durum planted area for 2021 is expected to total 1.54 million acres, down 9 percent from the previous year.

Producers intend to harvest 51.7 million acres of all hay in 2021, down 1 percent from 2020. If realized, this will represent the lowest total hay harvested area since 1908.

Area expected to be planted to sugarbeets for the 2021 crop year is estimated at 1.17 million acres, up 1 percent from 2020.

Growers intend to plant 1.54 million acres of dry edible beans in 2021, down 11 percent from the previous season’s 1.74 million acres.
