WYOMING WINTER WHEAT VARIETIES 2020 CROP

Dear Wyoming Agriculturalist,

An estimated 130,000 total acres were seeded in Wyoming in the fall of 2019 for harvest in 2020. Cowboy was the most popular winter wheat variety seeded in Wyoming for the 2020 crop with 16.8 percent of the reported winter wheat acreage. SY Monument was second followed by Warhorse.

The data for this release was collected from the 2019 December Ag Survey and the 2019 County Agricultural Production Survey conducted by the USDA/NASS, Mountain Regional Field Office. The surveys of producers in Wyoming were not sampled to provide a direct expansion of the seeded acreage by variety or a measure of the sampling error.

Thank you to the Wyoming Business Council - Agribusiness Division for providing funding and thank you to all the Wyoming producers whose continued cooperation makes this information possible. If you have any questions about this or any other report, please call us toll-free at 800-892-1660 or 800-392-3202.

Cowboy was most popular variety for the second consecutive year accounting for 16.8 percent of the reported acres planted for harvest in 2020. SY Monument remained the second most popular variety at 13.9 percent, and Warhorse moved up from sixth place to third place at 7.3 percent of reported acres for the 2020 winter wheat crop. The next leading varieties with enough producer reports for publication separately were SY Wolf, SY Spur, Buckskin, Brawl CL Plus, and Willow Creek, at 6.4 percent, 5.5 percent, 5.4 percent, 3.9 percent, and 1.8 percent of the reported acreage, respectively. AP 503 CL2, Breck, Canvas, Pronghorn, WB 4269, and WB 4462 each had one percent or more of the reported seeded acreage but are not published separately to avoid disclosure of individual operations and are included in the Others category.

Winter Wheat: Reported Percent, Planted by Variety, Wyoming 2011-2020

Variety	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
