## WYOMING WINTER WHEAT VARIETIES 2014 CROP Issued March 14, 2014

Dear Wyoming Agriculturalist,

Pronghorn was the most popular winter wheat variety seeded in Wyoming for the 2014 crop with 25.8 percent of the total winter wheat acreage. Buckskin was second followed by Goodstreak. The data for this release was collected with the 2013 December Ag Survey and the 2013 County Agricultural Production Survey conducted by the USDA/NASS Wyoming Field Office. Thank you to the Wyoming Business Council - Agribusiness Division for providing funding.

Thank you to all of the Wyoming producers whose continued cooperation makes this information possible. If you have any questions about this or any other report, please call us toll-free at 800-892-1660 or 800-643-5533.

Winter Wheat Varieties  
Percent of Total Acreage Seeded by Top Varieties  
Wyoming, Crop Years 2005-2014

### PRONGHORN BECOMES DOMINANT WINTER WHEAT VARIETY PLANTED

Pronghorn claims the largest winter wheat acreage seeded in Wyoming, accounting for 25.8 percent of the 160,000 acres planted for harvest in 2014, ending 30 consecutive years that **Buckskin** was the most planted variety. This is the first year that Pronghorn has been the most popular variety. **Buckskin**, at 20.6 percent, and **Goodstreak**, at 4.8 percent, were the second and third most popular varieties for the 2014 winter wheat crop. The next leading varieties were Centerfield, Hatcher and SY Wolf at 3.2, 2.9, and 2.9 percent of the State's acreage, respectively. Other varieties with one percent or more of the acreage were WB-Grainfield, Cowboy, Yellowstone, and T158. Camelot and Settler CL each had one percent of more of the seeded acreage but are not published separately to avoid disclosure of individual operations and are included in Others.
