

Field Crop Program February 2024

Every 5 years NASS conducts a program review following the completion of the Census of Agriculture. The primary purpose is to ensure that the NASS annual estimating program targets commodities and states most relevant based on the latest available information. Last fall we announced the program review and requested stakeholder input.

The primary source of information for the program review is the Census of Agriculture, since it is the most comprehensive source of data; however we also take into consideration estimates from the current annual estimating program and administrative data. The program changes balance resources across all of the programs included in the annual estimating program, which represents over 400 individual reports.

Dry edible peas removed wrinkled seed peas and Austrian winter peas estimates/totals.

Removing the wrinkled seed peas and Austrian winter peas from the dry edible peas estimates has been an industry request for many years. This move will make NASS estimates more consistent with industry.

Potato type percentage.

NASS is discontinuing the publishing of potato types percentage estimates, which were published in the December and February Potato Stocks report and the Acreage report.

Potato certified seed.

NASS is discontinuing the publishing of potato certified seed estimate, which were published in the September *Crop Production* report.

Potato stocks and processing.

NASS is discontinuing the publishing of the Klamath Basin potato stock estimate in the Potato Stocks report. All other State level potato stock estimates will continued to be published. NASS is discontinuing the monthly Malheur county and other than Malheur county processing breakout. All other monthly processing breakouts will continue in the Potato Stocks report. NASS is discontinuing the monthly dehydrated estimate in the Potato Stocks report. NASS will continue to publish the annual dehydrated total in the annual Potato Summary report. NASS will discontinue the regional breakout in the annual Potato Summary report. NASS will continue to publish the US total.

Dry edible beans class estimates.

NASS will discontinue publishing planted class estimates in August Crop Production report. NASS will continue class to publish end of season class estimates for acreage, yield, and production in the Crop Production Annual Summary report. NASS will no longer be breaking out the class estimates for small white, baby lima, and large lima. These classes will now be collected and published in the other class. NASS will begin breaking out the white kidney class which was previously included in the other class estimate.

Objective Yield

NASS is not making any changes to the Objective Yield program.

The following tables document the survey periods and sample sizes by crop.

Corn**												
Crop	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Illinois									200	200	200	
Indiana									100	100	100	
Iowa									200	200	200	
Kansas									150	150	150	
Minnesota									180	180	180	
Missouri									150	150	150	
Nebraska									200	200	200	
Ohio									140	140	140	
South Dakota									100	100	100	
Wisconsin									140	140	140	
TOTAL									1,560	1,560	1,560	

** Sample sizes are preliminary.

Cotton**												
Crop	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Arkansas									70	70	70	70
Georgia									175	175	175	175
Mississippi									95	95	95	95
Texas								***	500	500	500	500
TOTAL								***	840	840	840	840

** Sample sizes are preliminary.

*** Only samples in southern portions of Texas will be enumerated in August.

Soybeans**												
Crop	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Arkansas									140	140	140	
Illinois									200	200	200

Washington						80	160	160				
TOTAL					257	835	1,155	1,155				

In-season forecasts for field crops.

NASS publishes in-season forecasts for a number of field crops. The following table indicates the crops that are forecasted by month.

Crop	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Barley							Federal	Federal				
Beans, Dry								Federal		Federal		
Canola										Federal		
Chickpeas									Federal			
Corn, Grain								Federal	Federal	Federal	Federal	
Cotton, Pima								Federal	Federal	Federal	Federal	Federal
Cotton, Upland								Federal	Federal	Federal	Federal	Federal
Hay								Federal		Federal		
Hops								Federal				
Lentils									Federal			
Oats							Federal	Federal				
Peanuts								Federal	Federal	Federal	Federal	
Peas, Dry									Federal			
Potatoes											Federal	
Rice								Federal	Federal	Federal	Federal	
Sorghum, Grain								Federal	Federal	Federal	Federal	
Soybeans								Federal	Federal	Federal	Federal	
Sugarbeets								Federal	Federal	Federal	Federal	
Sugarcane		Federal						Federal	Federal	Federal	Federal	Federal
Sunflowers										Federal		
Tobacco							Federal	Federal	Federal	Federal		
Wheat, Durum					Federal ^{1/}	Federal ^{1/}	Federal	Federal				
Wheat, Oth Spring							Federal	Federal				
Wheat, Winter					Federal	Federal	Federal	Federal				

Note: "Federal" indicates forecast is part of the NASS annual estimating program.

^{1/} Only Arizona and California forecasted.

States included in the estimating program for field crops.

For each crop, both production and total value of production were reviewed. Totals were arrayed from largest to smallest. States that account for the largest proportion of the total were identified for inclusion in the annual estimating program. This allows us to provide the most useful data to the agricultural sector in the most efficient means possible given the limited available resources.
