

HONEY

Honey production from Maine and Vermont producers with five or more colonies totaled 624,000 pounds in 2008, an increase of thirteen percent from 2007. Yields from Maine's and Vermont's 12,000 colonies producing honey averaged 52 pounds in 2008, compared with 40

pounds a year earlier. Total value of production for the two states totaled \$1,032,000, up 21 percent from the previous year. Nationwide, 2008 honey production totaled 160.9 million pounds, an increase of eight percent from the previous year.

¹ For producers with five or more honey producing colonies. Colonies which produced honey in more than one state were counted in each state.

² Honey producing colonies are the maximum number of colonies from which honey was taken during the year including colonies which did not survive the entire year.

³ Stocks held by producers.

⁴ Average price per pound based on expanded sales.

⁵ Value of production is equal to production multiplied by average price per pound.

⁶ CT, DE, MD, MA, NH, OK, RI, and SC not published separately to avoid disclosing data for individual operations.

⁷ Due to rounding, total colonies multiplied by total yield may not exactly equal production.
