

How to Receive NASS New England Reports:

As part of the USDA National Agriculture Statistic Service's Mission to provide "...timely, accurate, and useful statistics in service to U.S. agriculture." the New England Field office offers periodic publications with New England specific agricultural data. These releases report the results of surveys conducted by both the USDA NASS's National Headquarters in Washington DC and the New England Field Office in Concord, New Hampshire. **Free** electronic copies of releases are available from the NASS homepage www.nass.usda.gov; New England field office publications are located at www.nass.usda.gov/NH. **E-mail** subscriptions are also provided to interested subscribers **free** of charge by the **Mann Library**; when a current report is released, it is sent via e-mail to the list of subscribers for that report.

Electronic Reports via E-mail or Internet

To subscribe online go to the NASS homepage. Select **Publications** from the top menu. On the Publications page, scroll down to the **Syndication** menu on the right hand side. Choose either **National** or **State** from the **Receive Reports by Email** section and follow the instructions shown.

Paper Reports Via Mail

For paper subscriptions to national releases call 1-800-999-6779 and ask for a free copy of the NASS Products and Services catalog. The catalog is issued every December and includes the annual calendar of release dates.

Below is a list of reports available from the New England Field Office. **Please circle the box to subscribe to a report.**

- 901
- AGRICULTURAL REVIEW:** (14 publications per year): Agricultural statistics in New England are published at the end of each month. This report includes information about field crops, tobacco, fruit, potatoes and potato stocks, vegetables, livestock, poultry and other special features. You will also receive the annual Cash Receipts report in September and the Fruits and Vegetables Price and Yield report in February.

- 910
- MAPLE SYRUP:** The annual summary of maple syrup production and prices in New England and the United States is published in June.

- 960
- POTATO SIZE AND GRADE REPORT and POTATO CHEMICAL USE REPORT:** A summary of Maine potato acreage, yield, size, and grade is published in January. Agriculture Chemical Usage is published in August.

- 961
- CRANBERRIES:** Acreage and production in Maine, Massachusetts, and four other major states are published twice a year. The forecast of production is published in August; final production is published in January.

- 962
- WILD BLUEBERRIES:** Maine production is published in January and July.

- 900
- ANNUAL AGRICULTURAL STATISTICS – (1 publication per year):** This publication contains agricultural statistics for several recent years. Crop, livestock, economic, and other statistics for all six New England States are included in one issue – published in June (*available free on the Internet*). Although the report is not complete until late spring, beginning in May, each section is posted on the Internet at www.nass.usda.gov/neng as soon as it is ready for publication.
