## USDA MEASURES AGRICULTURAL LABOR COSTS

There were 33,000 hired workers on farms across New England and New York during the survey week of January 6 - 12, 2002, an increase of 18 percent from one year ago when there were 28,000 hired farm workers across the region. Nationally, 731,000 workers were hired on farms during the survey week, compared with 691,000 hired workers the previous year. In the Northeast region hired workers earned an average of \$9.46 per hour during the January 2002 survey week, up 40 cents per hour from January 2001. Across the United States, hired workers were paid an average of \$8.96 per hour in January 2002 compared to \$8.66 in January 2001.

These statistics are summarized from the quarterly Agricultural Labor survey. The cost and availability of farm labor are major components of operators' productivity and return on investment. Therefore, information about the agricultural labor force is very important to farmers, grower associations, lenders, lawmakers, and local and national agencies.

Beginning the third week of April 2002, the New England Agricultural Statistics Service will contact approximately 360 agricultural producers to ask for their help in a quarterly nationwide effort to measure the agricultural labor force. The producers selected for this project will be mailed a sample questionnaire and a letter requesting their help. Interviewers will conduct the survey by telephone or personal interviews between April 15 - 26, 2002.

"The cooperation of area farmers is essential in order to ensure that agriculture in New England is clearly represented," said Aubrey Davis, Director of the New England Agricultural Statistics Service. Response to the survey is voluntary, however, cooperation from all growers is essential to provide an accurate picture of agricultural labor in this region. All information about individual farms is held in strict confidence; data is only used in combination with reports from other producers to generate regional and national statistics.

The national survey results will be available in the **Farm Labor Report** from Washington, D.C. on May 17, at 3:00 pm. All reports are available on the Internet within a few minutes of the scheduled release time. Northeast and U.S. statistics are reprinted in the May issue of the **Ag Review**. The monthly New England **Ag Review** is available on the Internet and complimentary copies will be mailed to survey participants upon request.

[The New England Agricultural Statistics Service is a field office of USDA's National Agricultural Statistics Service. Located in Concord, New Hampshire, it is responsible for agricultural statistics in all six States in the region. The office can be reached at 1-800-642-9571 or through E-mail at [nass-nh@nass.usda.gov](mailto:nass-nh@nass.usda.gov). All national statistics and state level newsletters are available free from E-mail subscriptions and on the Internet at <http://www.usda.gov/nass/>.]
