The following footnotes and symbols are used throughout all tables with data from the 1997 Census of Agriculture.

- 1/ A farm is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. This definition has been used since the 1974 census.
 - 2/ Data are based on a sample of farms.
 - 3/ Total cropland includes land from which crops were harvested or hay was cut; land in orchards, Christmas trees, vineyards, nurseries, and greenhouses; cropland used only for pasture or grazing; land in cover crops, legumes, and soil-improvement grasses; land on which all crops failed; land in cultivated summer fallow; and idle cropland. Land in tapped maple trees is included in woodland not pastured.
 - 4/ Harvested cropland includes land from which crops were harvested or hay was cut; land in orchards, Christmas trees, vineyards, nurseries and greenhouses. Land from which two or more crops were harvested was counted only once. Land in tapped maple trees is included in woodland not pastured.
 - 5/ Net cash return is derived by subtracting total operating expenditures from the gross market value of agricultural products sold.
 - 6/ Includes layer hens in molt and other layer hens and pullets 20 weeks old and older.
 - 7/ Data shown for hay represent all hay crops including alfalfa, other tame, small grain, wild, grass silage, haylage and hay crops cut and fed green (green chop).
 - 8/ The acres of vegetables harvested is the summation of the acres of individual vegetables harvested. All the individual vegetable crops are not shown.
 - 9/ Orchard land includes land in bearing and non-bearing fruit trees, vineyards, and nut trees of all ages, including land on which all fruit crops failed. Respondents were instructed not to report abandoned plantings and plantings of fewer than 20 total fruit, nut trees, or grapevines.
 - 10/ Nursery and greenhouse crops grown for sale is the summation of individual items including: nursery crops, floriculture crops (bedding, foliage and potted flowering plants; cut flowers and florist greens), sod harvested, vegetable and flower seeds, dry bulbs, dry corms, dry rhizomes, dry tubers, cut Christmas trees harvested, greenhouse vegetables, mushrooms and an "other" category.
 - 11/ Rankings based on the sum of all six New England States. New England is then treated as one State and compared to the other 44 States in the Nation. Individual New England States are not listed which may in turn change the rank of States outside the region. For example, if two New England States are in the top 10 nationally, the New England ranking only takes one position and the 11th State then becomes number 10 in this table.
- D Data withheld to avoid disclosing information for individual farms
N Data not available or not published
S Withheld because estimate did not meet publication standards on the basis of either the response rate or a consistency review
Z Less than half of the unit reported
cwt Hundredweight
sq ft Square feet
