

## SWEET CORN (for Fresh Market)

Sweet corn production in New England totaled 2.4 million crates in 2001, five percent above 2000 production. Growers in the six-State region harvested 17,000 acres, 500 more acres than were harvested the previous year. The sweet corn crop fared better in the drought conditions of 2001 than in the cool, wet conditions which prevailed in 2000. Yield averaged 142 crates per

acre, slightly above the previous year's yield at 139 crates per acre. The value of sweet corn production for New England was placed at \$32.1 million in 2001, an increase of five percent from the previous year. New England growers received an average of \$13.28 per crate of sweet corn in 2001, down one percent from the 2000 price.
