USDA TO CONDUCT SEMIANNUAL CATTLE SURVEY

Concord, New Hampshire – The U.S. Department of Agriculture will contact more than 10,000 cattle operations in January to provide the latest and most accurate data on current industry conditions including cattle inventories and calf production.

“The January Cattle Survey provides New England producers the opportunity to serve as the frontline source of data on cattle” said Gary Keough, director of the New England Field Office of USDA’s National Agricultural Statistics Service (NASS). “In New England, we’ll be contacting about 1,100 operations in order to measure trends in beef and dairy cattle inventories, calf crop and cattle operations.”

Producers selected for the survey will have the option of responding via telephone, Internet, mail, or personal interview with a local NASS representative. “No matter how they choose to respond, they are providing an important service to the cattle industry and to U.S. agriculture as a whole,” Keough said. “Their responses will be compiled with those of their fellow producers nationwide, providing the only accurate and comprehensive estimate of the state of U.S. cattle production.”

“Results of this survey will benefit cattle producers and the entire cattle industry by providing them with timely accurate information. For instance, it helps producers make informed marketing decisions and plan for herd expansion or reduction. It also helps packers and government evaluate expected slaughter volume for future months and determine potential supplies for export,” Keough said.

As with all NASS surveys, information provided by respondents is confidential by law. NASS safeguards the privacy of all survey responses and publishes only state- and national-level data, ensuring that no individual operation or producer can be identified.

NASS will publish survey results in the biannual *Cattle* report, scheduled for release on January 29, 2010. The report will provide state- and national-level estimates of total inventory, beef cows, milk cows, bulls, replacement heifers, other heifers, steers, calves, and number of calves born during the previous year. This and all NASS reports are available online at www.nass.usda.gov. For additional information, you may call the NASS New England Field Office at 1-800-642-9571.
